MALAY VILLAGE MEDICINE

Prescriptions collected by I. H. Burkill and Mohamed Haniff

INTRODUCTION

When sickness comes in a Malay village the advice of a bomor, or physician of the native school, is sought: when childbirth occurs, a bidan or midwife is called in.

From competent persons of those two classes we obtained information in the following way. We toured through the Peninsula, and by the kind help of administrative officers, to whom we return our sincere thanks, were put into touch with those whom we wished to meet. They were asked to give us as much information as they could and to bring specimens in illustration of their simples. At a second meeting the information was taken down, and the specimens ticketed. Subsequently the specimens, which are preserved in the herbarium of the Botanic Gardens, Singapore, were determined and the information worked up.

We tried to avoid unexpected questions, for they beget gusts of fancy and incorrect assertions. We asked one very competent bomor to give his information in his own handwriting, for a man must think as he writes; but the information got was meagre. In all other cases we took down the information ourselves, and sometimes may have got the vernacular names mis-written. One of us (M.H.) spent a short time at Jor in contact with the trading Sakai who live there, and we obtained other information from the Malay-speaking Sakai of the Selangor-side of Pahang. The rest of the information was from Malays. We examined the shops of Chinese herbalists, and recorded the plants in them, but do not dare to record the unchecked Chinese names which were taken down.

The information thus got together is set down here without any comments upon the efficacy of the simples. It is given for each record in the following order:

(1) the botanical name;
(2) the Malay name as the informant used it;
(3) the name of the most important place in the neighbour-
hood of the informant’s dwelling;
(4) the number which we gave to the specimen which the
informant brought, and which remains attached to it
in the herbarium of the Botanic Gardens, Singapore;
(5) the complaint for which it is used, and
(6) the way in which it is used.

After this information, an index and glossary of the vernacular names follow. The glossary has been added because so many
of the names are determined by a plant’s uses and not by its
appearance; and as a consequence of this, plants most diverse
to the eye, if the same use, get the same name, to the
surprise of botanists and others who, knowing the plants but
not the Malays, impute inaccuracy to the latter.

An explanation must be given of the term ubat meroyan,
which we are forced to use frequently. The Malays are apt to
consider all sicknesses following child-birth as originating at
that time of exposure of the mother to the attacks of evil
spirits, and to place them in a category called sakit meroyan
(mereyan in some parts): for instance, diarrhoea at any time
within many months is sakit meroyan tahi; a discharge of blood
is sakit meroyan darah, and rheumatism sakit meroyan angin.
To ward against such sicknesses, they administer over the first
three days after child-birth—this period being one during which
evil spirits possess the most power—preparations called ubat
meroyan; and the word meroyan enters into the name of the
plant used (perhaps often only when so used), sometimes in an
exceedingly fanciful expression. This is particularly the case
in Pahang. An ubat meroyan may not be intended to have any
immediate effect, and many of the plants in the class possess the
medicinal value of sympathy, but none chemico-physiologically.

DILLENIACEAE

Delima sarmentosa, Linn.

1. Mempelas. Kuala Kangsar, 16020.—Child-birth. A decoc-
tion of the roots as an ubat meroyan.
   Pound the leaves with turmeric and rice, and poultice.
3. Mempelas. Kuala Tembeling, 16066.—Boils. Apply the
   young leaves cold to boils that have not burst.
   with those of Melastoma decemfidum, Ardisia sp. and another
   undetermined plant, and drink the decoction.
5. Mempelas. Bentong, 16483.—Pains in the bones. Take
   the twigs of this and of Micromelum hirsutum, Alstonia angusti-
loba, Fagraea racemosa, Peronema canescens, Zingiber cassumunar and Areca catechu; and exorcise the disease by beating the body with the bunch.

**Tetracera assa**, DC.

**Tetracera fragrans**, Ridl.

**Acrotrema costatum**, Jack

**MAGNOLIACEAE**

**Michelia Champaca**, Linn.

11. Chempaka. Beserah, 17648.—Child-birth. The leaves are pounded, and smeared over the body after child-birth.

**ANONACEAE**

**Uvaria purpurea**, Blume

13. Meroyan otak. Pekan, 17246.—Child-birth. Boil the root and take the decoction as an ubat meroyan, by itself or mixed with others.

**Uvaria ?purpurea**, Blume

15. Daun esek nanah. Grik, 13738.—Flatulence. Eat the leaf with rice.

**Uvaria micrantha**, Hook. f. & Thoms.

16. Daun ekor bukit kampong. Kuala Kangsar, 16010.—Child-birth. The leaves are made into a decoction, taken as an ubat meroyan.

17. Daun larak. Kuala Tembeling, 15840.—Child-birth. The root is boiled with that of Psychotria stipulacea, and taken as an ubat meroyan.

**Uvaria sp.**

18. Pisang-pisang keruing. Raub, 16225.—Child-birth. The root is made into a decoction, and this is taken as an ubat meroyan.
Uvaria sp.

Uvaria sp.

Anona muricata, Linn.
22. Durian makah. Telok Anson, 15919.—Stomach ache.
23. Durian makah. Telok Anson, 15919.—Coughs and colds. Lotion made from the leaves applied to the throat.
24. Durian makah. Telok Anson, 16161.—Rheumatism. A lotion from the leaves, with seed of *Nigella sativa*, onion and asafoetida.

Anona reticulata, Linn.
25. Nona kapri. Alor Sta, 10457.—Epilepsy or convulsions. Way of using not recorded.
26. Nona kapri. Kuala Kangsar, 15958.—Toothache. Scrape the bark from the root and apply it to the gums.

Anona sp.

Canangium odoratum, Baill.

Canangium?
31. Leniayah (variation of neriah). Grik, 13797.—Itch. The same.

Desmos sp.
32. Pagar anak. Pekan, 17302.—Child-birth. Boil the root and take the decoction as an ubat meroyan.

Desmos chinensis, Lour.
34. Tepang. Beserah, 17626.—Child-birth. The same.

Polyalthia Beccarii, King

Polyalthia hypoleuca, Hook. f.
Polyalthia sp.
37. Punai bintang. Bentong, 16742.—Child-birth. A decoction is prepared by boiling and used as an ubat meroyan.

Anaxagorea Scortechinii, King
38. Sekobang kechil. Raub, 16221.—Child-birth. A decoction of the root is used as an ubat meroyan.

Goniothalamus macrophyllus, Hook. f.
40. Lada hutan. Manchis, 16776.—Fever. Boil the leaves and steam the patient. Swellings. Heat the leaves and apply them.

Goniothalamus Scortechinii, King
41. Akar gajah beranak. Grik, 12349, 13753, 13764.—Child-birth. A decoction is apparently much used, of it alone or in compounds, as with Paramignya, see no. 240.
42. Daun pelah besar (? for pelangas besar). Grik, 12536.—Child-birth. The same.

Goniothalamus sp.

Oxymitra ? affinis, Hook. f.
44. Keremanah. Alor Sta, 10417.—Ringworm.

Oxymitra latifolia, Hook. f.

Melodorum ? fulgens, Hook. f.
46. Medang salah hutan. Taiping, 13261.—Child-birth. The leaves in a decoction for use as an ubat meroyan.

Melodorum cylindricum, Hook. f.
47. Tepak. Grik, 12339.—Diarrhoea. A decoction of the root is drunk.

Melodorum lanuginosum, Hook. f.

Melodorum ? lanuginosum, Hook. f.
50. Larak api. Pekan, 17298.—Child-birth. A decoction of the roots is administered as an ubat meroyan.
51. Larak api. Pekan, 17298.—Stomach ache. The same.

? Xylopia malayana, Hook. f.
52. Meroyan angin. Pekan, 17247.—Child-birth. The roots are boiled and the decoction used as an ubat meroyan.
Xylopia ferruginea, Hook. f.
53. Jangkak. Tapah, 14152.—Vomiting. A decoction of the leaves and bark is taken to stop vomiting.

Anonaceae incertae
59. Lelimau. Karak, 16630.—Nervous complaints. A preparation of it and Bauhinia \textit{?bidentata} is given internally.
60. Kabut. Manchis, 16762.—Sprains. Boil and foment with the decoction.

MENISPERMACEAE

Tinospora crispa, Miers
61. Bertangwali (elsewhere petawali). Grik, 12334.—Cholera. A decoction from any part of the plant taken internally.
63. Patau wali. Batu Gajah, 13415.—Worms in children. Make a decoction and foment the body. Then exorcise and drive downward the worms by tying the stem round the neck. The charm also keeps stinging insects away.
65. Petawali. Telok Anson, 15869.—Small pox. The same.

Fibraurea chloroleuca, Miers

Coscinium Blumeanum, Miers
69. Kekunyit. Raub, 17011.—Prickly heat. Rub the skin with the stem or root.
70. Daun balik angin (this name really belongs to Macaranga, \&c.). Kuala Kangsar, 16012.—Medicinally used; but way of using not recorded.

Tiliacora?
Pericampylus incanus, Miers
72. Minyak pinyang. Raub, 16822.—High fever. Infuse its leaves with those of Merremia vitifolia, Bridelia tomentosa, Gleichenia linearis and Selaginella Willdenowii in cold water for a night, and give the infusion to drink morning by morning or evening by evening, making it afresh for each day.

Stephania rotunda, Lour.
73. Daun nasi betina (for nasi-nasi betina). Kuala Kangsar, 15576.—Headache. Bruise the leaves and poultice.

Cyclea laxiflora, Miers
75. Daun nerong keman (?for terong kemang). Kuala Kangsar, 15549.—Piles. Boil the root and stem, and drink the decoction.
77. Akar pahit. Raub, 16970.—Asthma. Make a decoction and drink it.

Menispermacea
78. Ubat setong (elsewhere ubat restong). Bentong, 16477.—Ulceration of the nose. Burn the root and inhale the smoke of it.

CAPPARIDACEAE

Cleome viscosa, Linn.
79. Maman puteh or maman pantai. Grik, 12315.—Rheumatism. Pound and smear over the part affected.
80. Maman puteh or maman pantai. Grik, 12548.—Rheumatism. Pound it with Selaginella atroviridis and smear over the part affected.
81. Maman puteh or maman pantai. Grik, 13642.—Blood in the stools. Drink a decoction.
82. Mahmud pantai (for maman pantai). Batu Gajah, 13407.—Headache. Pound and poultice the head.
83. Maman pantai. Telok Anson, 15624.—Headache. The same.

Gynandropsis pentaphylla, DC.
84. Maman. Telok Anson, 15641.—Headache. The same.
85. Maman. Telok Anson, 16271.—Headache. Pound with the seed of Nigella sativa, and poultice the head.

Capparis micracantha, DC.
86. Melada. Alor Sta, 10470, 10449.—Swellings. Pound the leaves and fruit with salt and turmeric, and poultice.
172

VIOLACEAE

Rinorea Kunstleriana (Alsodeia Kunstleriana, King).
87. Gemotan pachat. Grik, 13765.—Ulceration of the nose. Burn the root and inhale the smoke.
88. Lumbor. Raub, 16965.—Ulceration of the nose. Make a poultice of it; also make a decoction and drink it.

Rinorea echinocarpa (Alsodeia echinocarpa, Korth.).
89. Rengkoh. Raub, 16245.—Child-birth. A decoction of the roots is used as an ubat meroyan.

Rinorea sp.
91. Setong pachal. Manchis, 16758.—Ulceration of the nose. Burn the plant and inhale the smoke.

PITTOSPORACEAE

Pittosporum ferrugineum, Ait.
92. Belalang puak (or belalai puak). Beserah, 17580.—Fever. Pound the thick root and poultice.

POLYGALACEAE

Xanthophyllum sp.
93. Minyak berok. Raub, 16982.—Pain in region of the heart. Poultice the chest with the leaves.

PORTULACACEAE

Portulaca oleracea, Linn.

Portulaca pilosa, Linn.
95. Penawar. Bentong, 16595.—Boils in the groin. Make a poultice of it along with Monochoria vaginalis and turmeric. It is stocked in Chinese herbalists’ shops in Penang (13604).

HYPERICACEAE

Cratoxylon polyanthum, Korth.

Cratoxylon formosum, Benth.
97. Geronggang betina. Tanjong Malim, 14043.—Skin-diseases. Pound the leaves and the bark with coconut oil and poultice.

Cratoxylon sp.
98. Mempat. Pekan, 17297.—Stomach ache. Boil the root and the leaves, and drink the decoction.
FLACOURTIACEAE

Flacourtia Rukam, Zoll. & Moritz.
99. Rukam. Tanjong Malim, 13499.—Inflammation of eyelids. Squeeze the leaves and apply the juice.

Flacourtia Jangomas, Raeuschel (F. Cataphracta, Roxb.).
100. Kerekup. Alor Sta, 10409.—Herpes. Roots are crushed and juice applied.
101. Akar pulasan. Grik, 13737, 12340.—Distension of stomach. A decoction of leaves or roots is administered.
102. Ekor serangat (?serangga). Kuala Kangsar, 15968.—Diarrhoea. Boil the leaves and drink the decoction.
103. Akar temberak. Kuala Kangsar, 15579.—Child-birth. The leaves are boiled and the decoction used as an ubat meroyan.
105. Bebuas akar. Kuala Tembeling, 16056.—Sore throat. Crush the roots and hold the paste in the mouth.

Pangium edule, Reinw.
106. Kepayang. Tanjong Malim, 14071.—Boils. Pound the seeds and poultice incipient boils to arrest them.

GUTTIFERAE

Garcinia Hombroniana, Pierre

Garcinia Mangostana, Linn.
108. Manggis. Telok Anson, 15649.—Circumcision and other like wounds. Infuse the leaves and unripe bananas, thicken with benzoin and apply.

Garcinia atroviridis, Griff.
109. Gelugor. Telok Anson, 15868.—Child-birth. Pound the leaves and use the juice as an ubat meroyan.
110. Asam gelugor. Tanjong Malim, 14045.—Ear-ache. A decoction of the leaf and the root is dropped into the ear.

Garcinia Gaudichaudii, Planch. & Triana
111. Kandis. Manchis, 16779.—Cuts. Rub the root on to the cuts.

Garcinia sp.

Calophyllum ?Kunstleri, King
Calophyllum sp.

TERNSTROEMIACEAE
Eurya acuminata, DC.
115. Jerok puteh and jerok merah. Bentong, 16605, 16606.—Skin disease appearing as pustules. Pound and use as a poultice.

Archytaea Vahlili, Choisy
116. Nyolang padang. Pekan, 17283.—Stomach ache. Boil the leaves or root, and drink the decoction.

MALVACEAE
Gossypium brasiliense, Macfad.
119. Kapas. Telok Anson, 15270.—Headache. Bruise the leaves along with rice-water and poultice the head.
120. Kapas. Pekan, 17214.—Fever. Take the leaves, along with the leaves of Hibiscus rosa-sinensis, shoots of Gardenia florida, and leaves of Gleichenia linearis; make a decoction and drink sparingly, cold, for high fever.
121. Kapas. Beserah, 17570. Fever. Pound the root with the roots of Nephelium lappaceum, Albizia myriophylla, and Eugenia urceolata, the ferns Stenochlaena palustris and Lygodium flexuosum; and give this juice internally.
122. Kapuah. Singapore. Against possession by spirits. Burn the cotton fibre and smoke an infant to keep evil spirits away.

Eriodendron anfractuosum, DC.
124. Kekabu. Grik, 12373.—Syphilis. Boil the leaves and drink the decoction.
125. Kekabu. Kuala Kangsar, 15981.—Labour. Bruise the leaves in cold water and give to drink.
126. Kekabu. Telok Anson, 16171.—Labour. The same.
127. Kekabau. Beserah, 17561.—Difficult breathing in children, due to colds or asthma. Pound the bark with benzoin and administer internally.

Sida rhombifolia, Linn.
129. Senanguri and getangguri. Grik, 12343, 13621.—Fever. Boil the root, and give the decoction for high fever.

130. Senanguri. Grik, 12366.—Irregular menses. Boil the whole plant, and drink the decoction.

132. Akar leguni. Grik, 12466.—Fever in small children. A decoction of the leaves may be used.

133. Jerun. Kuala Kangsar, 16018.—Against possession by spirits. After a death take the plant, dip it in water, and sprinkle the house for the purpose of keeping the spirit of the departed from it.

134. Jerun. Kuala Kangsar, 15539.—Fever. Rub the root upon a stone, and give the juice internally.

137. Jerun. Telok Anson, 16165.—Abdominal pain such as appendicitis. Infuse it with seed of Cuminum cyminum and asafoetida, and give to drink; with the lees poultice the abdomen.

138. Patiyang and pah liman (for peliman). Tapah, 13962, 13970.—Eyes that water. Apply.

139. Pekan. Tanjong Malim, 13494.—Toothache. Rub the leaves on the gums.

140. Seliguri. Tanjong Malim, 14058.—Headache. Pound the plant with leaves of Blumea balsamifera, and poultice.

142. Senduri. Kuala Tembeling, 16060.—Herpes about the loins. Pound the root and poultice.

143. Senguri. Raub, Pahang, 16971.—Chicken-pox. Pound the plant and poultice with it.

144. Sapu leman. Singapore.—Boils. Pound the leaves and rub them gently over the boil.

_Sida carpinifolia_, Linn. f.

_Sida sp._

146. Kuku gerda. Prov. Wellesley.—Colic. Pound the leaves and poultice. At the same time boil some, and drink the decoction.

147. Seliguri. Singapore.—Toothache. Pound a leaf and pack a hollow tooth with it.

_Abutilon indicum_, Don

148. Pokok kembang lohor. Alor Sta, 10465.—Ear-ache. Make a decoction and drop it hot into the ear.
Urena lobata, Linn.
149. Pulut, pulut-pulut and pepulut. Alor Sta, 10434.—Blood in stools. The way of using not recorded.
150. Pepulut. Grik, 12343, 12531.—Fever, long-established. The juice of the root, with salt and eggs, taken internally.
153. Pulut. Beserah, 17579.—Snake-bite. Chew the root of the plant with prepared betel, or if not available a bit of atap, and spit on to the wound.
154. Pulut. Beserah, 17636.—Headache. Pound it, along with leaves of Mussaenda glabra, of Antidesma ghaesembilla, and of Mallotus cochinchinensis; and poultice.

Hibiscus Sabdariffa, Linn.
155. Asam susor. Telok Anson, 15913.—Use not recorded.

Hibiscus esculentus, Linn.

Hibiscus rosa-sinensis, Linn.
158. Bunga raya. Grik, 12528.—High fever. The same.
159. Bunga raya. Telok Anson, 15614.—Venereal disease. Pound the root in water, and drink. The white-flowered plant is recommended.
162. Bunga raya. Telok Anson, 16267.—Headache. Infuse the leaves and bathe the head.
163. Bunga raya. Bentong, 16471.—Sore eyes. Boil the root with leaves of Curculigo latifolia, and drop the decoction into the eyes. (The specimen supplied with this information happened to be a hybrid of H. rosa-sinensis with H. lasiopetalus.)
164. Bunga raya. Pekan, 17215.—Fever. With Gossypium, &c.; see no. 120, above.
165. Bunga raya. Pekan, 17273.—Fever. Boil its root with roots of Durio zibethinus, of Nephelium lappaceum, of Nephelium ?mutabile, and of Artocarpus integrifolia; and drink the decoction. Boil the leaves of all these and poultice with the mixture.

Hibiscus Abelmoschus, Linn.
167. Kapas hantu. Telok Anson, 15292.—Rheumatic pains around the abdomen. The same poultice.
168. Kapas hantu. Telok Anson, 16180.—Varicose veins. Pound the root along with seed of *Cuminum cyminum*, and poultice.

**Hibiscus tiliaceus**, Linn.
170. Bebaru. Alor Sta, 10430.—High fever. Take the shoots and the flowers.

**Durio zibethinus**, Linn.

?**Boschia Griffithii**, Mast.
174. Hahu-hahu. Telok Anson, 16282.—Ophthalmia. Take the tender new leaves and apply them: upon the first day use 7, upon the second 5, upon the third 3, and on the fourth day 1.

**STERCULIACEAE**

**Pterospermum Blumeanum**, Korth.
175. Bayor. Batu Gajah, 13379.—Enlarged spleen. Pound the bark and apply as a poultice.

**Pterospermum sp.**
177. Bayor. Tapah, 13977.—Fever. Poultice over the spleen.

**Melochia corchorifolia**, Linn.
179. Lemak ketam. Telok Anson, 15637.—Vomiting. The leaves are administered to stop vomiting.
180. Lemak ketam. Telok Anson, 10309.—Swellings about the abdomen. Pound the leaves and poultice.
181. Lemak ketam. Telok Anson, 16166.—Heart, pain at. Pound the leaves and apply as a poultice.
182. Lemak ketam. Tapah, 13548.—The same.
184. Bayam rusa. Bentong, 16460.—Urinary trouble. Boil the leaves, with leaves of *Milletia sericea* and *Celosia argentea*; and drink the decoction.

**Abroma augusta**, Linn. f.

?**Abroma augusta**, Linn. f.

186. Kuku singa. Telok Anson, 16298.—Headache. Pound the leaves, and poultice with them.

**Leptonychia glabra**, Turcz.

187. Selusoh semang. Taiping, 10559.—Child-birth. The roots are made into a decoction taken in labour.

188. Penawar demum panas. Kuala Kangsar, 16014.—Fever. Pound the leaves in cold water and use as a lotion.

189. Jarum. Beserah, 17564.—Ulcerated noses. Pound the leaves with the leaves of *Clausena excavata*, onions and seed of *Nigella sativa*, and apply as a poultice.

190. Sekinchah. Pekan, 17220.—Fever. Pound the root, and swallow, for severe fever.

**TILIACEAE**

**Grewia paniculata**, Roxb.

193. Chenderai. Sungei Raya, 13398.—Itch. The same.

198. Ara dani. Karak, 16631.—Fever, continued, diagnosed as kepialu. Pound the leaves, and poultice.

**Corchorus capsularis**, Linn.

200. Ubat batok kering. Tapah, 13529.—Cough. The leaves, in the form of a decoction, administered for a consumptive cough, and also given as a bitter tonic to children.
Corchorus ?capsularis, Linn.
201. Jelita. Telok Anson, 16289.—Dysentery. A decoction of the roots is given internally.

Elaeocarpus ?obtusus, Blume

GONOSTYLACEAE

Gonostylus Maingayi, Hook. f.

OXALIDACEAE

Biophytum adiantoides, Wight
204. Daun payong. Grik, 12321. Stomach ache in very small children. Pound the whole plant with Hedyotis glabra, Hedyotis hispida, Borferia hispida and Piper porphyrophyllum, and use as a poultice.
205. Daun payong. Grik, 12539.—For the same. Burn to ashes and pound the ashes with Hedyotis hispida, and poultice.

Averrhoa Bilimbi, Linn.
206. Belimbing or belimbing buloh. Grik, 12506, 13650.—Syphilis. Pound the leaves with the fruit into a paste; swallow it fresh, or let it ferment and then swallow it.
208. Belimbing buloh. Tapah, 13953.—Itch. Pound and heat the leaves, and apply as a hot fomentation.
209. Belimbing. Bentong, 16458.—Coughs. Take the leaves with leaves of Carallia suffruticosa and Lygodium scandens; pour over them coconut milk, infuse and drink cold.

Averrhoa Carambola, Linn.
211. Belimbing. Tanjong Malim, 14057.—Vomiting. Make a decoction of the leaves and fruit, and give it to drink.
213. Belimbing besi. Kuala Tembeling, 15850.—Chickenpox. Crush the leaves with turmeric and broken rice, and apply as a poultice.

Connaropsis sericea, Ridl.
Connaropsis macrophylla, King
215. Belimbing hutan. Singapore.—As a poultice.

RUTACEAE

Evodia latifolia, DC.
216. Daun chabang tiga. Kuala Tembeling, 15844.—Fever, remittent. Take a handful of the leaves: place them parallel and grasp them so: cut off whatever projects on either side of the hand; warm what is retained over a fire and then apply it to the body.

Evodia malayana, Ridl.

Zanthoxylum hirtellum, Ridl.
218. Kayu sekatok. Manchis, 16778.—Toothache. Pound the bark and put it into a hollow tooth.

Glycosmis puberula, Lindl.
219. Nerapi. Alor Sta, 10474.—Nausea. Pound the leaves, bark and roots, with black pepper, and ginger and glutinous rice thoroughly; and then poultice.

Glycosmis ?puberula, Lindl.

Micromelum hirsutum, Oliv.
221. Senagu. Grik, 13721.—Vertigo. Take a bit into the mouth and chew it. Possession. It protects from this also.
226. Secherek. Telok Anson, 15611.—Gout. Take an infusion of the leaves in the morning.
228. Chemama. Bentong, 16474.—Sickness in the bones. Take the twigs of this, and the twigs of several other plants in a bunch, and beat the body with the bunch. For the plants see Delima sarmentosa, no. 5.

_Clausena excavata_, Burm.

231. Semuru (elsewhere Semutuh). Beserah, 17590.—Fever. Take the leaves and poultice the head with them.

_Murraya exotica_, Linn.

_Luvunga scandens_, Ham.

_Paramignya sp._

238. Mechanduk. Manchis, 16767.—Abdominal complaints. The same.

239. Panak rimba. Manchis, 16782.—Syphilis. Boil the plant and use the decoction as a lotion.

? _Paramignya._

_Atalantia Roxburghiana_, Hook. f.

241. Limau pagar. Tanjong Malim, 14049.—Stomach ache. Pound the leaves with the leaves of _Citrus aurantifolia_ and of _Areca catechu_, and swallow the juice.

_Citrus hystrix_, DC.

242. Limau hantu. Alor Sta, 10466.—Pain in the joints. Take its leaf with turmeric: shred fine, and boil; then use the decoction as a lotion over the whole body.

_Citrus aurantifolia_, Swingle

243. Limau nipsis, the lime. Alor Sta, 10446.—Headache. Pound the leaves and apply to the head.
244. Limau nipsis. Grik, 12356.—Possession. Chew the leaf, and bespatter the face of the bewitched who sees ghosts in his sleep.

245. Limau nipsis. Telok Anson, 15854.—Headache during confinement. Pound the leaves in water, and sprinkle over the head.

246. Limau nipsis. Tanjong Malim, 14050.—Stomach ache. Pound the leaves with the leaves of *Atalantia* and of *Areca*, and swallow. See *Atalantia*, no. 241.

**Citrus medica**, Linn.

248. Race Limau kapas. Grik, 12510.—Possession. Boil the leaves with the bark of *Entada* (which is used as soap) and the leaves of *Paspalum sp.*; bathe in the water, which will drive the evil spirits away.

**Citrus medica**, Linn.

249. Race Limau mata kerbau, which has a big fruit. Raub, 16210.—Vermifuge and for loss of appetite. Take fresh shoots; make an infusion and drink it.

**Citrus decumana**, Linn.

250. Limau besar. Beserah, 17631.—Aches and swellings. Boil the leaves and bathe in the hot infusion.

**SIMARUBACEAE**

**Brucea sumatrana**, Roxb.

251. Lada pahit or melada. Taiping, 13297.—Boils. Pound and use as a plaster.

252. Lada pahit. Grik, 12358.—Boils. The same.

253. Lada pahit. Grik, 13722.—Stomach ache. Boil, and drink the infusion.

254. Lada pahit. Grik, 12310.—Fever. Pound the plant with the leaves of *Solanum sarmentosum*, and drink the juice.

255. Suntang hutan. Kuala Kangsar, 15595.—Discoloration of the skin. Pound the leaves with a little coral lime and apply as a poultice.

256. Lada barau. Tapah, 14155.—Scurf. Pound the leaves and apply as a poultice.

257. Lada pahit. Budu, 15813.—Remittent fever. Pound the leaves and rub the paste on the body over the spleen.

**Eurycoma longifolia**, Jack

258. Tongkat ali. Taiping, 13282.—Tonic. Infuse the roots, and drink.

259. Tukar ali and tongkat ali. Grik, 12503, 13750.—Tonic. The same.

262. Jelas (Sakai name). Tapah, 14157.—Wounds and ulcers. Scrape the bark and poultice with it.

263. Penawar puteh. Beserah, 17643.—Fever. The same.

264. Penawar pahit. Pekan, 17287.—Fever. Boil the roots and leaves, and drink the infusion.

265. Petala bumi. Bentong, 16737.—Child-birth. Pull up the plant in silence: under no circumstance mention its name: make a decoction of it by boiling, and use as an ubat meroyan.

266. Muntah bumi. Bentong, 16717.—Headache.

BURSERACEAE

Santiria ?longifolia, King

MELIACEAE

Sandoricum indicum, Cav.

268. Sentol. Alor Sta, 10419.—Fever. Chew the leaves and bespatter the face of the patient.

269. Sentol. Grik, 12369.—Fever. The same.

270. Setol. Telok Anson, 15639.—Remittent fever. Pound the leaves in water and give to drink every morning.

Sandoricum nervosum, Blume

Aglaia salicifolia, Ridl.

273. Sikjot (a Semang name). Kuala Lipis, 15743.—Child-birth. Pound the leaves in cold water, and use the water for washing the body after child-birth.

Lansium domesticum, Jack

274. Langsat. Telok Anson, 15851.—Sore eyes. Drop the juice into the eye.

275. Langsat. Tanjong Malim, 14010.—Dysentery. Boil the bark and the leaves, and drink the decoction.

276. Langsat. Beserah, 17616.—Scorpion stings. Pound the bark and apply it to the place.
Carapa moluccensis, Lam.
277. Nireh. Telok Anson, 16263.—Stomach ache. Boil the bark, and drink the infusion.
278. Nireh. Telok Anson, 16263.—Wounds. Powder the bark and poultice with it.

CHAILLETIACEAE

Chailletia Griffithii, Hook. f.

OLACACEAE

Ochanostachys amentacea, Mast.
281. Petaling. Tanjong Malim, 14018.—Fever. Boil the bark with the bark of Pometia pinnata and of Koompassia malaccensis, and bathe the body in the infusion for high fever.
282. Petaling. Bentong, 16724.—Fever. Boil the bark, and use the infusion for bathing the body.

Gomphandra ?affinis, Mast.
283. Taring pelandok. Raub, 16239.—Child-birth. Boil the root, and use the decoction as an ubat meroyan.

Gomphandra salicifolia, Ridl.

ILICACEAE

?Ilex cymosa, Blume
287. Mengkirai. Pekan, 17240.—Boils. Pound the root, and poultice to ripen the boils.

CELASTRACEAE

Hippocratea ?indica, Willd.
288. Alor Sta, 10416.—Ringworm. The way of using not recorded.

Hippocratea sp.
290. Akar beting (elsewhere akar bintang). Beserah, 17587.—Cracked lips. Make an extract from the root with cold water, and drink it.
Salacia grandiflora, Kurz

?Salacia grandiflora, Kurz

Salacia flavescens, Kurz

Salacia sp.
Or mixed with very numerous different roots.

RHAMNACEAE

Zizyphus ?Kunstleri, King
296. Pala hutan (?=pialu hutan). Kuala Kangsar, 15577.—Child-birth. The leaves are boiled and the decoction used as an ubat meroyan.
297. Lawang hutan. Kuala Kangsar, 16233.—Child-birth. The roots are boiled and the decoction used as an ubat meroyan.

Zizyphus elegans, Wall.
298. Chong kayet (Sakai name). Tapah, 14287. Fever. The root is scraped and the raspings boiled: the decoction is swallowed.

Zizyphus sp.

Ventilago ?oblongifolia, Blume
300. Akar penak. Raub, 16978.—Cholera. A poultice of the leaves applied all over the body.

Vitis cinnamomea, Wall.

Vitis Lawsoni, King
304. Akar noh papan. Grik, 13793.—Fever in infants. As a poultice in the neighbourhood of the spleen.
305. Akar noh keroh. Grik, 12471.—Boils. Heat the leaf and apply it warm.

Vitis repens, Wight & Arn.

Vitis hastata, Miq.
309. Riang-riang. Raub, 16814.—Boils. Pound and apply as a poultice to boil before they ripen.

Vitis trifolia, Linn.
310. Lakum. Telok Anson. 16281.—Fever. Boil the leaves and bathe in the decoction while hot.
311. Lakom. Raub, 16830.—Fever. The same.
312. Lakom. Karak, 16625.—High fever. Boil its leaves with the leaves of Cassia nodosa, of Ocimum basilicum, of Mallotus floribundus and of Gleichenia linearis; and give to the patient to drink.

Vitis trifolia, Linn.
313. Lakum. Alor Sta, 10440.—Ulceration of the nose. As a poultice.

Vitis novemfolia, Wall.
315. Kepayang (by error). Telok Anson, 15885.—Skin complaints. Use as a poultice.
316. Asam papan. Kuala Lipis, 15765.—Remittent fever. Apply the leaves, heated, over the spleen.

Leea gigantea, Griff.

Leea ?sambucina, Willd.
319. Memali. Kuala Tembeling, 16059.—Caterpillar itch. Pound the leaves with turmeric and broken rice, and apply as a poultice.

Leea Curtisii, King
321. Memali. Grik, 12451.—Hair, to preserve. Pound the leaf with Chinese tobacco and smear it on the head.
Cardiospermum Halicacabum, Linn.
322. Bintang beraleh. Grik, 12335.—Bubo in the groin. Pound with *Selaginella atroviridis*, and poultice.

**Allophylus ternatus**, Lour.
323. Chichang (usually chinchang). Telok Anson, 15294.—Thrush. Apply the juice of the leaves.

**Erioglossum edule**, Blume
324. Mertajam. Alor Sta, 10414.—Itch (kayap). The leaves as a poultice.
326. Mertajam. Grik, 13780.—Fever. Make a decoction of the leaves and take it.
327. Terajam. Beserah, 17641.—Fever. Boil the leaves with those of *Fagraea racemosa*; drink the decoction.
328. Terajam. Beserah, 17641.—Fever. Boil the leaves with those of *Eurycoma longifolia* and root of *Ilex cymosa*, and drink the decoction. See no. 263.

**Lepisanthes Kunstleri**, King
329. Derajang (doubtless = terentang). Beserah, 17547.—Broken bones. Pound the bark with leaves of *Grewia paniculata*, *Spatholobus* and *Hedyotis capitellata*, and poultice. See no. 197.

**Lepisanthes ?cuneata**, Hiern
330. Ruku-ruku. Kuala Kangsar, 15993.—Cough. Pound the leaves, extract the juice, and take this.
331. Teradang (for terentang). Kuala Kangsar, 15978.—Fever. Pound the leaves in cold water and use the extract in the bath.

**Lepisanthes sp.**
332. Terajang (for terentang). Beserah, 17595.—Stomach ache. Boil the root, and drink the decoction.
Headache. The same treatment.

**Otophora resecta**, Radlk.
333. Setengok. Beserah, 17566.—Itch (kudis). Pound the root with roots of *Tetracera asa*, *Eugenia malaccensis* and *E. pendens*, and also benzoin; apply as a poultice.

**Nephelium lappaceum**, Linn.
334. Rambutan. Grik, Perak, 12514.—High fever. Boil the leaves with the leaves of *Carallia suffruticosa*, of *Pometia pin-nata* and *Ardisia sp.*, and use the decoction in a bath.
335. Rambutan jantan. Telok Anson, 15892.—Diseases of the tongue. Use a decoction of the bark.
336. Rambutan. Beserah, 17571.—Fever. Pound the root with the root of Gossypium brasiliense, &c., and give the juice internally. See Gossypium, no. 121.

337. Rambutan. Pekan, 17269.—Fever. Boil the roots with the roots of Hibiscus rosa-sinensis, &c., and give to drink. See Hibiscus rosa-sinensis, no. 165.

338. Rambutan. Pekan, 17269.—Headache. Pound the leaves and use as a poultice upon the head.

Nephelium mutabile, Blume

339. Pulasan. Taiping, 10560.—Worms. The root is used as a vermifuge.

340. Pulasan. Pekan, 17271.—Fever. Roots used with those of Hibiscus rosa-sinensis, &c., for making a decoction which is administered. See Hibiscus rosa-sinensis, no. 165.

341. Pulasan. Pekan, 17271. Fever. Leaves may be substituted for the root.

342. Pulasan. Bentong, 16454.—Fever. Boil the leaves with Gleichenia linearis, and bathe the whole body with the decoction.

Pometia pinnata, Forst.

343. Kasai. Grik, 13751.—High fever. Boil the leaves, and use the decoction in the bath.

345. Kasai. Telok Anson, 15271.—Fever. Probably the same usage.

346. Kasai. Tanjong Malim, 13978.—Fever. Boil the bark and use the decoction in the bath.

347. Kasai. Tanjong Malim, 14017.—Fever. Boil the bark with the bark of Ochanostachys amentacea, and use in the bath. See no. 281.

Guioa pleuropteris, Radlkf.

348. Senyamok. Beserah, 17601.—Fever. Boil the root, and give the decoction to drink.

349. Senyamok. Beserah, 17639.—Stomach ache. Boil the root with the leaves of Glochidion littorale, and give to drink.

Mischocarpus Lessertianus, Ridl.

350. Kelat puteh. Pekan, 17245.—Cough. Boil the root and give the decoction to drink for deep-seated cough—‘batok dalam’.

ANACARDIACEAE

Buchanania lucida, Blume

351. Otak hudang. Beserah, 17588.—Headache. Pound the leaves and use as a poultice.
Mangifera sp.
352. Pauh. Pekan, 17279.—Flatulence. Boil the bark with the bark of Beilschmiedia pahangensis, and drink.

Anacardium occidentale, Linn.
353. Janggus. Telok Anson, 14350.—Diarrhoea, severe. Boil the bark, and drink the decoction.

Microstemon velutina, Engl.
354. Pelong. Raub, 17006.—Ringworm. Apply the oil from the seeds.

CONNARACEAE

Connarus oligophyllus, Wall.
355. Merensa. Pekan, 17239.—Stomach ache. Boil the bark, and drink the decoction.

Rourea humilis, Blume
357. Akar balah. Raub, 16977.—Thrush. Rub the root upon the sore places.
359. Pengichut. Manchis, 16777.—Fever. Boil the roots, and drink the decoction.

Rourea ?similis, Blume

?Rouea sp.
362. Merbau akar. Grik, 13749.—Ulcers. Pound the roots, and poultice with them.
363. Merbau akar. Grik, 12544.—Boils. Pound the roots with the leaves of Carallia suffruticosa, and poultice.

Cnestis ramiflora, Griff.
364. Susun kelapa. Raub, 16234.—Child-birth. Boil the roots, and drink the decoction as an ubat meroyan.
368. Karang-karang. Manchis, 16540.—Sprains. Boil and foment the place with the decoction.
?Cnestis ramiflora, Griff.
369. Rumput kachit. Grik, 12520.—Malaria. Pound the leaves with those of Anplectrum glaucum, and plants of Phylanthus pulcher and Pellionia Duvaiana, and poultice.

**LEGUMINOSAE**

**Abrus precatorius**, Linn.
370. Saga kechil and saga akar. Telok Anson, 16262.—Use not recorded.

**Abrus ?pulchellus**, Wall.

**Dunbaria Scortechinii**, Prain
372. Tampong urat. Grik, 13715.—Fever. Pound the leaves and use as a poultice.

**Flemingia strobilifera**, R.Br.
376. Serengan. Taiping, 13274.—Rubefacient. Boil the leaves, and bathe in the water while still hot.
378. Serengan. Telok Anson, 16292.—Child-birth. Boil the leaves, and use the decoction for washing the body.
379. Serengan. Telok Anson, 15929.—Rheumatism. Use as a lotion.

**Dolichos Lablab**, Linn.
380. Kachang kara. Bentong.—Ear-ache. Pound the leaves with the leaves of Stereospermum fimbriatum, and squeeze the juice into the ear.

**Phaseolus calcaratus**, Roxb.
381. Kachang sepalit. Telok Anson, 15625.—Stomach ache. Pound the leaves with rice flour, and poultice the abdomen.

**Vigna Catiang**, Walp.
382. Kachang perut ayam. Telok Anson, 16287.—Ear-ache. Take the leaves, put them into a vessel and plunge it into rice that is boiling; when steamed, remove; squeeze the juice into the ear.
Pueraria phaseoloides, Benth.
383. Tampong urat. Tapah, 13968.—Ulcers, foul-smelling (pekong). Take a decoction internally: 'it sweeps them out'.

?Dioclea reflexa, Hook. f.
385. Pinang kera. Pekan, 17243.—Heart-trouble. Boil the root, and drink the decoction.

Canavalia gladiata, DC.
386. Kachang parang. Singapore.—Stomach ache. Pound the seed, and apply to the abdomen as a poultice.

?Spatholobus sp.

Mucuna biplicata, Teysm. & Binn.

Erythrina indica, Lam.
389. Dedap. Grik, 13784.—Toothache. Pound a bit of bark and press it into a hollow tooth.
390. Dedap. Grik, 12317.—Tonic. Boil the leaves, and drink the decoction to increase the appetite.

Indigofera suffruticosa, Mill. (1. anil, Linn.)
391. Tarom. Telok Anson, 15281.—Stomach ache. Boil the leaves, and drink the decoction.

Indigofera ?suffruticosa, Mill.
392. Sekebah. Kuala Kangsar, 15996.—Fever. Bruise the leaves in cold water, and wash the body with the water to bring down the temperature.

Milletia sericea, Benth.
393. Jemerah. Grik, 12452.—Toothache. Pound the leaf, and place it in a hollow tooth.
394. Sekebah. Kuala Kangsar, 15532.—Fever. Boil the leaves, and drink the decoction.
397. Mambul. Bentong, 16462.—Urinary trouble. Boil the leaves with the leaves of Melochia corchorifolia and Celosia argentea, and drink the decoction. See no. 184.
?Milletia Hemsleyana, Prain

Dalbergia tamarindifolia, Roxb.
399. Semelit jangkar. Telok Anson, 16200.—Varicose veins. Pound the leaves with rice water, and poultice the skin over the veins.
400. Lortan haji. Telok Anson, 15618.—Nervous complaints. Pound the leaves with seed of Cuminum cyminum, and poultice.

Pterocarpus indicus, Willd.
401. Sena. Telok Anson, 15276, 15890.—Sore mouth. The fresh kino is applied by touching the sore places with the bark.

Derris dalbergioides, Baker
403. Daun beratai. Kuala Lipis, 15782.—Itch. Crush the bark with a little coconut oil and smear it upon the skin. It is also the ubat ruan buta, or medicine for the spell cast on a man by blinding a murril fish in his name.

Derris elliptica, Benth.
404. Tuba. Telok Anson, 15640.—Itch, &c. Boil the plant, mix with coconut oil, and apply as a poultice.

Uraria crinita, Desv.
409. Serengan hutan. Bentong, 16735.—Child-birth. When the body is sore after child-birth, wash it with a lotion made from this plant.

Uraria lagopoides, DC.
410. Korat tanah. Alor Sta, 10469.—Dysentery. Boil leaves and roots together, and give the decoction to drink.

Desmodium triflorum, DC.
411. Rumput barek sisek puteh. Grik, 13644.—Skin complaints. Pound and make a poultice with it.
412. Sisek tenggeling. Budu, 15814.—Colic. Boil the roots and drink the decoction; also take the leaves and poultice with them.
Desmodium heterophyllum, DC.
413. Peparu bendang. Grik, 12313.—Stomach ache. Make a decoction and drink it.

Desmodium pulchellum, Baker

Desmodium capitatum, DC.

Desmodium gangeticum, DC.
418. Sepantan. Telok Anson, 16254.—Diarrhoea. Make a decoction from the roots and drink it.

Desmodium gyroides, DC.
419. Leguni. Grik, 13717.—?Rheumatism.

Cajanus indicus, Spreng.
421. Kachang kayu. Telok Anson, 16193.—Abdominal trouble such as appendicitis. Boil the leaves with seed of Cumimum cymimum, and drink the decoction.
422. Kachang kayu. Telok Anson, 15286.—Cough. Pound the leaves with a little salt, and eat the mixture morning by morning.
424. Kachang kayu. Kuala Kangsar, 15590.—Ear-ache. Squeeze the juice of the leaves into the ear.

Psophocarpus tetragonolobus, DC.
425. Kachang belimbing. Tanjong Malim, 14026.—Smallpox. Boil the leaves with the leaves of Peristrophe acuminata, Kalanchoe laciniata and Costus speciosus, and tubers of Stachyphyrium and leaves of Drymoglossum heterophyllum, and use the decoction as a lotion upon the skin.

Cassia nodosa, Ham.
426. Bereksa. Kuala Lipis, 15769.—Boils between the shoulders. Pound the leaves: crush them and poultice with them.
428. Saga. Karak, 16627.—High fever. Boil the leaves with the leaves of Vitis trifolia, &c., and give to drink. See no. 312.
429. Kayu busok. Raub, 17019.—Itch. Pound the bark, and apply it.

*Cassia siamea*, Lam.

430. Jeragor. Kuala Kangsar, 15974.—Convulsions. Tie to the child's neck a piece of the thick root, as a charm. It is believed also that the presence of the root prevents worms in the child's stomach from travelling upwards; and that they by so doing would cause convulsions.

*Cassia Tora*, Linn.

432. Gelenggang kechil. Grik, 13706.—Skin complaints. The leaves are used as a substitute for those of *Cassia alata*, if the latter is not available.

*Cassia obtusifolia*, Linn.

433. Gelenggang sayor, Telok Anson, 14347.—Boils and carbuncles. Pound the leaves with rice, and apply.

436. Gelenggang kechil. Bentong, 16604.—Skin complaints. Pound the leaves with leaves of *Dysophylla auricularia* and of *Leucas zeylanica*, and use as a poultice. If put upon the faces of children with prickly heat, it will induce sleep.

*Cassia alata*, Linn.

438. Gelenggang besar. Grik, 12370, 12534, 13702.—Skin complaints. Rub the leaf directly upon the skin. It is recommended that the patient should sleep for three nights upon a banana leaf that he may not rub the juice off.

440. Gelenggang and gelenggang besar. Telok Anson, 16277, 10308.—Skin complaints, particularly ringworm. The same as the last.

441. Gelenggang. Telok Anson, 15927, 15939, 16185.—Skin complaints. Pound the leaves and poultice.

442. Gelenggang. Telok Anson, 10308.—Constipation. Make a decoction of the leaves and drink it.

443. Gelenggang besar. Tapah, 13521.—Skin complaints. Rub the leaf on to the skin.

444. Gelenggang besar. Tanjong Malim, 14015, 14069.—Constipation. Boil the leaves, and drink the decoction.
445. Gelenggang besar. Tanjong Malim, 14015, 14069.—Constipation. Add a few leaves to the rice cooked for the table.
446. Gelenggang besar. Kuala Tembeling, 16064.—Constipation. Boil the young leaves and the flowers, and drink the decoction.
447. Gelenggang besar. Kuala Tembeling, 16064.—Constipation. Boil the young leaves and the flowers, and drink the decoction.
449. Gelenggang. Beserah, 17559.—Skin complaints. Apply the juice expressed from the leaves.
450. Gelenggang. Pekan, 17282.—Ringworm. Pound the leaves with sulphur and saltpetre, or with a little gunpowder taken from Chinese crackers, and apply to the skin.
452. Gelenggang. Bentong, 16797.—Skin complaints. Pound the leaves of Leea ?sambucina, of Hydrocotyle asiatica, of Momordica Charantia, and of Fimbristyli saestivalis: mix in a little damar of the Melipona bee, and if fancied a little gunpowder: then poultice.

Koompassia malaccensis, Benth.
453. Kumpas. Tanjong Malim, 14019.—Fever. Boil the bark with the bark of Pometia pinnata and Ochanostachys amentacea, and bathe in the infusion.

?Dialium laurinum, Baker
454. Samak penangok (?samak pelanchok). Tanjong Malim, 14042.—Baldness. Poultice the head with the leaves.

Bauhinia acuminata, Linn.
455. Bunga perak. Telok Anson, 15860.—Ulceration of the nose. Pound the leaves and poultice with them.

Bauhinia ?Griffithiana, Prain
457. Selak kerebok. Tapah, 13525.—Ulceration of the nose. Make a decoction and give it to drink.

Bauhinia ?bidentata, Jack

Tamarindus indica, Linn.
459. Asam jawa. Grik, 12360.—Put the shoots into the patient’s bath to induce fits of perspiration.
460. Asam jawa. Grik, 12302.—Ulcers. Pound the bark, and poultice with it.
Sindora sp.
461. Sampar hantu. Singapore.—Children’s ailments. Make a lotion from it and Acorus calamus, for external use.

Afzelia retusa, Kurz
462. Malapari. Telok Anson, 15901.—Use not recorded, but medicinal.

Peltophorum ?dasyrachis, Kurz
463. Kerayong. Kuala Lipis, 15768.—Coughs. Pound the bark in water; strain and drink the liquor. The vernacular name belongs also to Parkia.

Mezoneuron sumatranum, Walk. & Arn.
464. Gorek. Taiping, 10554.—Child-birth. The leaves are boiled and the decoction used as an ubat meroyan. The vernacular name more properly belongs to Caesalpinia Bonducella.

466. Mentiong. Telok Anson, 15278.—Worms in children. Pound the leaves and poultice with them.

467. Tampu rengat. Bentong, 16614.—Diarrhoea and other complaints of the intestine. Boil the leaves with the rhizomes of Imperata arundinacea, and give to drink.

Caesalpinia Bonduc, Roxb.
468. Renting. Telok Anson, 15883.—Worms. The leaves made into a paste which is applied.

469. Gorek. Beserah, 17629.—Caterpillar itch. Make a paste by pounding the root, and apply it.

470. Gorek. Kuala Lipis, 15788.—Worms. Pound the leaves and apply the paste as a poultice over the abdomen, taking care on no account to touch the navel. It is used for children.

471. Gorek. Kuala Tembeling, 15836.—Regulating the menses. Boil the roots and drink the decoction; but no other part of the plant is useful for the purpose.

472. Kuku tupai. Raub, 16920.—Medicinally used, but method not ascertained.

473. Gorek-gorek. Raub, 16831.—Worms. Chew the leaves small; and spit the saliva on to the infant’s abdomen.

474. Gorek-gorek. Raub, 16831.—To it may be added leaves of Prenna pyramidata and Cyathula prostrata.

Caesalpinia Sappan, Linn.
475. Sepang. Manchis, 16760.—Vomiting blood. Boil the red wood and drink the decoction.

?Caesalpinia sp.
476. Nenering. Grik, 13638. Skin complaints. Make a decoction from the plant, drink some and apply some externally.
197

Adenanthera pavonina, Linn.

478. Saga. Bentong, 16609.—Tonic. Boil the leaves with the leaves of Sandoricum indicum, &c., and drink. See Sandoricum, no. 271.

Neptunia oleracea, Lour.

479. Kangkong putri or keman gajah. Telok Anson, 16192.—Fever. Infuse and mix the infusion with rice flour, and apply all over the body.

480. Keman ayer. Grik, 12318.—Ear-ache. Squeeze the juice of the stem into the ear.

Entada ?spiralis, Benth. (E. Schefferi, Ridl.).

481. Beluru. Telok Anson, 15646.—Abdominal complaints such as appendicitis. Burn the plant, and collect the ashes; rub them over the body.

Mimosa pudica, Linn.

482. Rumput malu. Telok Anson, 15946.—To purify the blood.

483. Memalu. Tanjong Malim, 14048.—For fretful children. Boil the plant and use the decoction for bathing them.

484. Memalu. Tanjong Malim, 14048.—The same. ‘Put a bit under their sleeping mat and they will sleep.’

485. Rumput malu-malu or rumput rimau. Kuala Tembeling, 16068.—Swellings. Pound the leaves with turmeric and broken rice, and poultice.

Acacia Farnesiana, Wild.

Albizzia myriophylla, Benth.

487. Tebu gajah. Beserah, 17575.—Fever. Pound the root with the roots of Gossypium brasiliense, &c., withdraw the juice, and give it to drink. See Gossypium, no. 121.

Pithecolobium lobatum, Benth.

489. Jering. Kuala Tembeling, 15842.—Pain at the heart. Use the same poultice.

Pithecolobium ?angulatum, Benth.

490. Petai belalang. Kuala Lipis, 15777.—Itch (kudis cheng-kereng). Burn the leaves; collect the ash; mix it with coconut oil and apply.

Pithecolobium clypearia, Benth.

198

492. Petai belalang. Telok Anson, 15631.—Chicken-pox. The same.

ROSACEAE

Pygeum ?persimile, Kurz
494. Selusoh (indicates the use, rather than the plant). Kuala Lipis, 15746.—Child-birth. A decoction of the leaves to facilitate delivery, among the Sakai.

Rubus alceifolius, Poir.
496. Tampu rengat. Kuala Lipis, 15793.—Child-birth. Boil the leaves, and steam the patient during seven days after childbirth.
497. Tampu rengat. Kuala Tembeling, 16062.—Dysentery. Boil the roots, and drink the decoction.
498. Tampu rengat. Raub, 16837.—Urinary trouble. The same.

CRASSULACEAE

Bryophyllum calycinum, Salisb.
499. Setawar padang. Kuala Kangsar, 15975.—Cough and pains in the chest. Pound the leaves with boiled rice, and poultice the chest.

Kalanchoe laciniata, DC.
501. Setawar. Kuala Kangsar, 16003.—Cough and cold in the chest. Pound the leaves and poultice the chest.
502. Setawar kampong. Kuala Kangsar, 15533.—Possession. The leaves are strewn to charm good spirits into a newly-built house, or into a house made unlucky by a death in it.
503. Setawar. Telok Anson, 16187.—Possession. Strew the leaves in the house to ward off evil spirits.

LEGNOTIDACEAE

Carallia suffruticosa, Ridl.
505. Sireh puyoh. Grik, 13736.—Worms. Infuse a very little in cold water, and drink the infusion.
506. Sireh puyoh. Grik, 12543.—Boils. Pound the leaves along with the roots of a Rourea (?), and poultice. See no. 363.
507. Sisek puyu. Grik, 12515.—High fever. Boil its leaves with those of *Nephelium lappaceum*, and of *Pometia pinnata*; use the decoction for bathing. See no. 334.

508. Sisek puyu. Budu, 15803.—Boils. Pound the tender leaves with turmeric and broken rice, and poultice.

509. Sireh puyoh. Beserah, 17646.—Child-birth. Pound the leaves and extract the juice; use this as an ubat meroyan.

510. Tulang daing. Bentong, 16459.—Coughs. Infuse the leaves with the leaves of *Averrhoa Bilimbi* and *Lygodium scandens* in coconut milk, and drink cold. See no. 209.

511. Tulang daing. Bentong, 16459.—Boils. Take the leaves with leaves of *Litsea amara*; pound them and poultice.

?Pellacalyx sp.

**COMBRETACEAE**

*Combretum* ?*acuminatum*, Roxb.

513. Songsong. Telok Anson, 15290.—Worms. Boil the leaves until the decoction is thick; then mix with rice flour and make into pills, which take.

515. Sangsong harus. Telok Anson, 15903.—Worms. The same.

516. Sangsong harus. Budu, 15798.—Boils. Make a thick paste by pounding the leaves, and poultice.

*Combretum* ?*sundaicum*, Miq.

*Combretum nigrescens*, King

*Quisqualis densiflora*, Wall.

519. Redani. Kuala Kangsar, 15542.—Worms in children. Pound the roots; extract the juice, and give this to drink.

?*Quisqualis densiflora*, Wall.

520. Dani. Raub, 16967.—Worms. Boil the leaves, and give to drink.

?*Quisqualis sp*.

**MYRTACEAE**

*Rhodamnia cinerea*, Jack

523. Jaing. Grik, 13745.—Stomach ache. Boil the roots with the leaves of Psidium Guyava and the leaves of Bridelia tomentosa, and drink the decoction.

524. Mempoyan. Raub, 17010.—Scalds. Pound the shoots, and poultice.

527. Poyan. Pekan, 17286.—Crush the leaves and swallow the juice also.

**Rhodomyrtus tomentosa**, Wight

528. Kemunting. Beserah, 17644.—Stomach ache. Boil the leaves and the roots with the leaves of Sideroxylon ferrugineum, and drink the decoction.

**Eugenia Jambos**, Linn.

**Eugenia malaccensis**, Linn.

532. Jambu bubul. Tanjong Malim, 14064.—Tongue, cracked and sore. Take the leaves; dry and powder them; then apply.

533. Jambu kling. Beserah, 17567.—Itch. Pound the roots with the roots of Tetracera assa, &c., and with benzoin, and poultice. See no. 7.

**Eugenia pendens**, Duthie

534. Jambu puteh. Beserah, 17568.—Itch. The same as the last.

**Eugenia ?chloranthera**, Duthie

**Eugenia lineata**, Duthie

**Eugenia polyantha**, Wight

538. Samak. Alor Sta, 10425.—Itch. Poultice with the leaves, root and bark.

**Eugenia ?urceolata**, King

540. Jambu ayer. Beserah, 17572.—Fever. Pound the root with the root of *Gossypium brasiliense*, &c., and administer the juice. See no. 121.

**Psidium Guyava**, Raddi

541. Jambu biji. Alor Sta, 10412.—Ringworm. The way of using not recorded.

543. Jambu biji. Grik, 12348.—Diarrhoea. Boil the leaves with a little gambier, and drink the decoction.

544. Jambu bereksa. Telok Anson, 15921.—Skin complaints. Boil the leaves, and use the decoction as a lotion.

545. Jambu bereksa. Telok Anson, 15289.—Diarrhoea. Boil the leaves, and drink the decoction for slight diarrhoea.

546. Jambu bereksa. Telok Anson, 16157.—Wounds. Boil the leaves, and use the decoction as a lotion.

547. Jambu biji. Pekan, 17267.—Stomach ache. Boil the leaves and drink the decoction.

548. Jambu padang or jambu biji. Bentong, 16468.—Stomach ache. Boil the leaves with those of *Vitex pubescens*, and drink the decoction.

**Barringtonia racemosa**, Roxb.

549. Putat kedad. Alor Sta, 10422.—Itch. Pound the leaves and the root, and poultice.

**Barringtonia ?racemosa**, Roxb.

551. Putat. Telok Anson, 15606.—Chicken-pox. Pound the leaves, and poultice.

**Barringtonia macrostachya**, Kurz

552. Putat. Kuala Kangsar, 16632.—Sore eyes. Pound the root, and apply.

553. Putat. Kuala Kangsar, 16632.—Ringworm. The same prescription.

**Barringtonia ?macrostachya**, Kurz

554. Putat. Raub, 16969.—Stomach ache. Boil the leaves, and drink the decoction.

**Barringtonia spicata**, Blume

555. Pokok gajah beranak. Taiping, 10556.—As a contraceptive, or perhaps as an abortient. The way of using not recorded.

556. Putat nasi. Grik, 12303.—Ulcers. Pound the bark and the leaves with the leaves of *Tamarindus indica*, and apply.
Barringtonia ? spicata, Blume
557. Putat nasik. Alor Sta, 10423.—Itch. Pound the root, the leaves and the bark; and poultice.

MELASTOMACEAE

Melastoma decemfidum, Roxb.
558. Senduduk. Bentong, 16585.—Dysentery. Boil the leaves with leaves of Delima sarmentosa, &c., and give the decoction to drink. See no. 4. This Melastoma is considered better than either of the other two sendudus which are available, i.e. M. malabathricum and Blastus Cogniauxii.

Melastoma malabathricum, Linn.

560. Keduduk. Batu Gajah, 13362.—Small-pox. Take the leaves and the root; dry and powder; sprinkle the powder over the pocks that they may dry up without leaving marks.

561. Senduduk. Tanjong Malim, 14009.—Dysentery. Boil the leaves with the leaves of Hedyotis capitellata and Ageratum conyzoides, and give to drink.

Melastoma polyanthum, Blume
562. Senudok. Beserah, 17603.—Child-birth. Boil the leaves and the root; give the decoction as an ubat meroyan.

Allomorphia malaccensis, Ridl.

Allomorphia exigua, Blume

565. Kenduduk. Manchis, 16770.—Remittent fever. Heat the leaves and apply them to the abdomen.

Allomorphia alata, Scort.
566. Puding hutan. Taiping, 13278.—Stomach ache. Boil the leaves, stem and root, and drink the decoction.

Blastus Cogniauxii, Stapf
567. Keduduk hutan or keduduk cherang. Taiping, 13298.—Child-birth. Boil the roots, and use the decoction as an ubat meroyan.

Sonerila nidularia, Stapf

570. Serengan kerbau. Taiping, 13298.—Stomach ache in children. Burn the plant; collect the ashes, and administer.
Phyllagathis rotundifolia, Blume
573. Tapak gajah. Raub, 16953.—Stomach ache. Boil the leaves and drink the decoction.

Marumia nemorosa, Blume
574. Senuduk. Raub, 16998.—Scalds. Rub the leaves upon the scalded place.

Dissochaeta gracilis, Blume
575. Chong keradak (Sakai name). Tapah, 14297.—Antidote to Antiaris poison. Make a decoction of the leaves and take it. (The time occupied in preparing a decoction would seem to make the remedy useless.)

Dissochaeta annulata, Hook. f.

Anplectrum glaucum, Triana
577. Kayu metah. Grik, 12523.—Malaria. Pound the leaves with the leaves of ?Cnestis ramiflora, &c., and poultice. See no. 369.

Anplectrum divaricatum, Triana
578. Lidah kuching or kopok. Bentong, 16680, 16728.—Child-birth. The same.
579. Kenduduk halus. Manchis, 16764.—Sprains. Boil the leaves, and bathe the place in the hot decoction daily.

Memecylon dichotomum, Clarke

Memecylon ?amplexicaule, Roxb.
581. Pekan. Alor Sta, 10475.—Dizziness. Boil its leaves with coriander seed and an onion; and use the decoction as a lotion upon the head in the morning.

Memecylon ?minutiflorum, Miq.
582. Sedawai hitam. Raub, 16219.—Child-birth. Boil the roots and use the decoction as an ubat meroyan.

LYTHRACEAE

Lawsonia inermis, Linn.
584. Inai. Telok Anson, 15601.—Circumcision. Pound the leaves, and use as a poultice.
585. Inai. Telok Anson, 16270.—Skin complaints. Pound the leaves with turmeric and rice, and use as a poultice.
586. Inai. Telok Anson, 14341.—Stomach ache. Make a decoction of the leaves and drink it.
587. Inai. Telok Anson, 14341.—Wounds. Pound the leaves and use as a poultice.
589. Inai parsi. Tanjong Malim, 14052.—Rheumatism in the body and distension of the stomach. Take the leaves, dry and powder them; mix with the yolk of an egg and smear over the body.

**Lagerstroemia floribunda**, Jack
590. Bungor. Sungei Raya, 13396.—Fever. Pound the leaves, and poultice the body during the hot stage.

**Lagerstroemia flos-reginae**, Retz.
591. Bongor. Pekan, 17277.—Abdominal pains. Boil the bark, and drink the decoction.

**Lagerstroemia flos-reginae**, Retz.
592. Bongor. Telok Anson, 15941.—Malaria. Pound the leaves, and poultice.

**Lagerstroemia sp.**
594. Bongor. Kuala Kangsar, 10350, 15578.—Fever. Take the leaves, smear with coconut oil; heat and apply hot to the abdomen.
597. Bungor betul. Kuala Lipis, 15792.—Fever. Take the leaves; heat them and apply over the spleen.

**Sonneratia acida**, Linn. f.
598. Berembang. Telok Anson, 15635.—Small-pox. Pound the leaves with broken rice, and poultice the body.

**Sonneratia Griffithii**, Kurz

**PUNICACEAE**

**Punica Granatum**, Linn.
600. Delima. Alor Sta, 10447.—Irregular menses. Take the roots and the leaves; boil, and drink the decoction.
601. Delima. Taiping, 15615.—Itch. Pound the leaves, and poultice.
602. Delima. Grik, 12352.—Irregular menses. Boil the leaves and the roots, and drink the decoction.

603. Delima. Beserah, 17553.—Sore eyes. Pound the root with the leaves of *Jasminum Sambac* and of *Sauropus albicans*, and squeeze the juice into the eyes.

**ONAGRACEAE**

**Jussiaea repens**, Linn.

604. Ubat kulit. Grik, 12426.—Skin complaints. Pound the leaves, and poultice.

**Jussiaea linifolia**, Vahl (J. suffruticosa, *Ridl.*)

605. Inai paya. Kuala Lipis, 15758.—Syphilis. Infuse the root in cold water, and drink the infusion.

**Jussiaea erecta**, Linn.

**PASSIFLORACEAE**

607. Lelayang. Kuala Kangsar, 15525.—Convulsions. Burn the leaves, and smoke the child.

**CUCURBITACEAE**

**Hodgsonia capniocarpa**, Ridl.

608. Kepayang. Grik, 12355.—Nose, complaints of the. Dry the leaves and burn them, inhaling the smoke.

609. Kepayang. Grik, 12355.—The same. Boil the leaves and drink the decoction.

611. Kepayang. Batu Gajah, 13400.—Nose, parasites in the. Squeeze the juice of the stem into the nostrils.

**Trichosanthes Wallichiana**, Wight

612. Jari buaya. Kuala Kangsar, 15535.—Miscarriage. Bandage the leaves upon the abdomen by using the leaves of the cultivated banana.

**Gymnopetalum cochinchinense**, Kurz

613. Tuwasah. Grik, 12453.—Miscarriage followed by tetanus. Boil the leaves and give the decoction to drink.

614. Tuwasah. Grik, 12453.—The fruit is said to be very poisonous, and this decoction to be an antidote.

615. Bertimum tikus. Telok Anson, 16286.—Ophthalmia. Pound the leaves: enfold in a clean cloth, and squeeze the juice through the cloth into the eyes.

**Momordica charantia**, Linn.

616. Peria or periok. Telok Anson, 15949.—Burns and scalds. Pound the leaves, and poultice.
617. Peria. Telok Anson, 15616.—Skin complaints in children. Boil the leaves, and use the decoction as a lotion.

618. Peria. Tanjong Malim, 14006.—Diarrhoea. Pound the leaves with the leaves of Adenostemma viscosum, of Dysophylla auricul aria, and of Polygonum barbatum; poultice the abdomen.

620. Peria kechil. Bentong, 16797.—Skin complaints. Pound the leaves with the leaves of Cassia alata, &c., and poultice. See Cassia alata, no. 452.

Melothria sp.

621. Akar belang. Raub, 16975.—Pain at the heart. Make a decoction and drink it.

Benincasa cerifera, Savi

622. Kundor. Bentong, 16456.—Bruises. Rub the leaves upon the bruise, or poultice with them.

Cucurbita Pepo, Linn.

623. Labu ayer. Telok Anson, 16268.—Discomfort during pregnancy. Take the leaves, infuse and mix ashes from the hearth, and use as a lotion upon the abdomen.

BEGONIACEAE

Begonia isoptera, Dryand.

Carica Papaya, Linn.

625. Betik. Telok Anson, 15865.—Worms. Infuse the leaves, and drink the infusion.

627. Betek. Bentong, 16469.—Colic. Infuse the leaves, and drink the infusion.

UMBELLIFERAE

Hydrocotyle asiatica, Linn.

628. Pegaga. Telok Anson, 15622.—As a cooling medicine. An infusion of the plant.

629. Pegaga. Telok Anson, 16265.—Rheumatism. Infuse the plant with an onion, and drink the infusion.

630. Pegaga. Grik, 13740, 12375.—Tonic. Eat with rice. (This use is almost universal in the Malay Peninsula.)

ARALIACEAE

Schefflera affinis, Ridl.
634. Bekak rengat. Grik, 13615.—Abdominal trouble. Boil the leaves, and administer the decoction.

Schefflera heterophylla, Harms

Trevesia cheirantha, Ridl.
636. Tapak etek. Taiping, 10555.—Fractured bones. Pound the leaves, and poultice with them.
638. Chengkam harimau. Kuala Kangsar, 15959.—Remittent fever. Smear the leaves with coconut oil; heat and apply hot to the abdomen.

CORNACEAE

Aralidium pinnatifidum, Moq.
641. Sebalai. Kuala Lipis, 15779.—Fevers. Smear the leaves with coconut oil; heat them and apply hot to the body.
642. Sebalai. Bentong, 16752.—Fever in children. Pound the leaves, and poultice over the abdomen.

RUBIACEAE

Mitragyne speciosa, Korth.
643. Biak. Telok Anson, 10307.—Wounds. Pound the leaves, and poultice with them.
644. Biak. Telok Anson, 10307.—Opium-craving. Take the leaves, boil them, and drink the decoction. A remedy apparently worse than the disease.
645. Biak. Tanjong Malim, 14066.—Worms in children. Bind the leaves under a bandage upon the abdomen at the time of going to rest.
646. Kotum. Tanjong Malim, 14022.—Enlarged spleen. Take the leaves with leaves of Morinda citrifolia, Blumea balssamifera and Oroxylum indicum; heat them, and apply hot over the spleen.

Anthocephalus indicus, Rich.
647. Kelapayan. Telok Anson, 10312.—Malaria. Smear the leaves with coconut oil; heat, and apply hot to the abdomen.
648. Kelampi. Telok Anson, 15603.—Intermittent fevers. The same application, but to the chest.

649. Kelampayan. Tapah, 13519, 13979.—High fever. The same application: keep the leaves in place all night; if they are found whole in the morning the patient will die; but if they have become cracked, he will recover.

**Uncaria ferrea**, DC.

650. Kait-kait. Telok Anson, 15300.—Wounds. Boil the leaves, and use the decoction as a lotion for cleaning the wounds.

651. Kekait merah. Kuala Lipis, 15780.—Inflammation of the intestines. Infuse the roots in cold water, without crushing them; drink this in the morning.

**Uncaria sp.**

**Coptosapelta flavescens**, Korth.

654. Sebereteh. Tanjong Malim, 14024.—Wind in children. Boil the leaves and use the decoction for bathing them.

656. Chenderai. Kuala Lipis, 15764.—Child-birth. Infuse the root in cold water; drink the infusion as an ubat meroyan.

657. Sebereteh. Budu, 15821.—Fever in children. Scrape the roots and boil the scrapings; give the decoction to drink.

**?Wendlandia paniculata**, DC.

661. Kait-kait merah. Raub, 16827.—Boils on the head. Pound the leaves with the leaves of *Macaranga triloba* and of *Smilax Helferi*, and poultice.

**Ophiorrhiza communis**, Ridl.

662. Peparu. Grik, 12328, 13639, 13773, 13616.—Enlarged spleen. Pound the plant, and poultice over the spleen.

663. Peparu. Grik, 13729.—Coughs. The same, poulticing the chest.

**Ophiorrhiza singaporensis**, Ridl.

664. Rumput lumor. Raub, 16963.—Leprosy. Rub the plant upon the place.
**Hedyotis capitellata**, Wall.

668. Daun semileh. Grik, 13735.—Lumbago. The same.

670. Sebueh. Telok Anson, 15858.—Heartburn. Make a decoction from the plant and drink it.

671. Chong churat (Sakai name). Tapah, 14154.—Fractured bones. Pound the leaves, and poultice.

672. Akar semelit (for akar sembelit). Tanjong Malim, 14008.—Dysentery. Boil the leaves with leaves of *Melastoma malabathricum* and *Ageratum conyzoides*, and drink. See no. 561.

674. Patah gogoh. Raub, 16236.—Child-birth. Boil the roots, and drink the decoction as an ubat meroyan.

675. Patah bubul. Raub, 16986.—Fractured bones. Poultice with the leaves.

676. Sekitan. Beserah, 17546.—Fractured bones. Pound the leaves with leaves of *Grewia paniculata*, &c., and poultice. See no. 197.

677. Sekitam. Beserah, 17666–3.—Child-birth. Pound the leaves, and administer the juice as an ubat meroyan.

680. Meroyan kuching. Bentong, 16607.—Bruises. Pound the leaves, and wrap them in a *Crinum* leaf; poultice with them.

681. Patah bubul. Karak, 16623.—Child-birth. Boil the roots with the leaves of *Didymocarpus crinitus* and *Dracaena conferta*, and use the decoction as an ubat meroyan.

682. Sekembang. Karak, 16637.—Constipation. Boil the roots, and drink the decoction for two or three days.

**Hedyotis glabra**, R.Br.

683. Katehmurai. Grik, 12323.—Stomach ache in very small children. Pound the plant with *Biophytum adiantoides*, &c., and poultice. See no. 204.

684. Chengkering. Batu Gajah, 13406.—For purifying the blood, to be used by women.

**Hedyotis congesta**, Wall.

Hedyotis hispida, Retz.
   686. Lidah tioni. Grik, 12538. For new-born children. Take the plant, with Biophytum adiantoides, Piper argenteum and Cheilanthes tenuifolia; reduce to ashes, and powder the abdomen.
   687. Lidah tioni. Grik, 12325.—Stomach ache in small children. Pound the plant with Biophytum adiantoides, &c., and use as a poultice. See no. 204.

Oldenlandia corymbosa, Linn.
   688. Penang, 13672.—Stocked in Chinese herbalists’ shops.

Oldenlandia diffusa, Roxb.
   689. Penang, 13659.—Stocked in Chinese herbalists’ shops.

Oldenlandia Heynei, Don
   690. Penang, 13655.—Stocked in Chinese herbalists’ shops.

Mussaenda villosa, Wall.
   691. Balek adap. Alor Sta, 10471.—‘Angin darah’. Chew its leaves with seed of Nigella sativa and an onion, and spray the abdomen.
   692. Balek adap. Budu, 15816.—Rheumatism. Boil the leaves with seed of Nigella sativa and garlic, and drink the decoction.

Mussaenda glabra, Vahl
   693. Balek adap. Tapah, 13951.—Headache. Poultice with the leaves.
   695. Balek adap. Pekan, 17306.—Child-birth. Boil the root, and give the decoction to drink.

Mussaenda sp.

Urophyllum hirsutum, Hook. f.

?Urophyllum glabrum, Wall.
   698. Bebulu. Raub, 16955.—Fever. Infuse the leaves in cold water, and give to drink.

?Randia Curtisii, King and Gamble

Gardenia florida, Linn.
703. Bunga china. Telok Anson, 15950.—Swollen breasts. The same.

**Ixora Lobbi**, Loud.
710. Jarum. Taiping, 10555.—Child-birth. The root is used as an ubat meroyan.
711. Salang. Raub, 17003.—Headache. Make a poultice from the leaves.

**Ixora stricta**, Roxb.
713. Pechah periok. Pekan, 17307.—Child-birth. The same.
714. Penujuh. Bentong, 16538.—Urinary trouble. Boil any part of this plant with the roots of *Cnestis ramiflora*, and drink the decoction.

**Ixora grandifolia**, Zoll. and Moritz.
715. Kayu tajam. Raub, 16961.—Stomach ache. Boil the leaves and drink the decoction when it has become cold.

**Ixora grandifolia**, Zoll. and Moritz.

**Ixora sp.**
717. Mata ayam. Pekan, 17230.—Stomach ache. Boil the roots and drink the decoction.
718. Pechah periok. Pekan, 17231.—Stomach ache. Boil the plant and drink the decoction.
Pavetta indica, Linn.

Pavetta indica, Linn.

Jenjarum. Kuala Kangsar, 15967.—Ulceration of the nose. Boil the leaves, and set the decoction to cool over night; both drink it and use it as a lotion.

Pavetta sp.

Morinda citrifolia, Linn.

725. Mengkudu besar. Kuala Kangsar, 16009.—Fever and cough. Heat the leaves, and apply them warm to the abdomen.
727. Mengkudu. Tanjong Malim, 14020.—Enlarged spleen. Heat the leaves with leaves of Mitragyna speciosa, &c., and apply hot over the spleen. See no. 646.

Morinda elliptica, Ridl.

732. Mengkudu. Telok Anson, 16284.—Remittent fever. Smear the leaves with coconut oil; heat and apply hot to the abdomen.
733. Menkudu or mengkudu. Telok Anson, 15867.—Piles. Boil the leaves and use the decoction as a lotion.
734. Mengkudu. Beserah, 17610.—Fever. Boil the leaves and drink the decoction.

Rennellia paniculata, King and Gamble

736. Akar bumi or urap gundor. Tapah, 14299.—Wounds. Rasp the bark, and apply the powder to wounds.
Canthium horridum, Blume
738. Ubat luka. Grik, 13739.—Fever. (The name implies also wounds.)

Canthium aciculatum, Ridl.
739. Melor hutan. Alor Sta, 10443.—Hiccough in small children. Boil the leaves and drink the decoction.

Psychotria sarmentosa, Blume

Psychotria rostrata, Blume
742. Piralu (Sakai). Bentong, 16716.—Headache. The way of using not recorded, but doubtless by poulticing.

Psychotria rhinocerotis, Reinw.
743. Gambir batu. Bentong, 16674.—Child-birth. Boil the plant (any part), and use the decoction as an ubat meroyan.

Psychotria montana, Blume
744. Selada. Raub, 17009.—Ulcers. Rub the leaves upon the ulcer.
746. Selada. Bentong, 16527.—Fever and enlarged spleen. Boil the leaves, and use the decoction as a lotion.

Psychotria stipulacea, Wall.
747. Salang. Tapah, 14153.—Swellings and prickly heat. Pound the leaves in a little water, and apply.
748. Sesalang. Budu, 15799.—Itch (kudis). Pound the roots, and poultice.
749. Meroyan sakat. Kuala Tembeling, 15841.—Child-birth. Boil the roots with the roots of Uvaria micrantha, and use the decoction as an ubat meroyan.

Psychotria sp.
750. Kayu lichin. Raub, 16964.—Leprosy. Boil the leaves and drink the decoction.

Chasalia curviflora, Thwaites

Lasianthus stipularis, Blume
755. Ubat barah. Bentong, 16532.—Noises in the head. Boil the leaves with the leaves of ?Lindera selangorensis, and drink the decoction. (The name suggests that it is used also for boils.)

Lasianthus oblongus, King and Gamble

Lasianthus villosus, Ridl.

Veneral disease in women. Boil the leaves and drink the decoction.

772. Tapak leman (for tapak sulaiman). Beserah, 17647/3.—Child-birth. Boil the leaves and the root, and use the decoction as an ubat meroyan.

Mikania scandens, Willd.

773. Selepat tungau. Raub, 16209.—Itch. Rub the leaves upon the place.

Ageratum conyzoides, Linn.

774. Daun misai kuching. Grik, 13716.—Fever. Boil the leaves and drink the decoction.

775. Rumput jalang. Telok Anson, 15861.—Urinary diseases. The way of using not recorded.

776. Sekedok. Tapah, 13549.—Diarrhoea in children. Take the leaves, and poultice with them upon the abdomen.

777. Senarong kambing. Tanjong Malim, 14007.—Dysentery. Boil the leaves with the leaves of Melastoma malabathricum and Hedyotis capitellata, and drink the decoction.

?Ageratum conyzoides, Linn.

Adenostemma viscosum, Forst.

779. Rumput tahi babi. Grik, 12311, 12398, 13622.—Skin diseases. Pound the leaves, boil them, and use the decoction as a lotion. This is especially serviceable for any skin complaint upon the face.

780. Rumput tahi babi. Kuala Kangsar, 15574.—Ulceration of the nose. Pound the leaves, squeeze out the juice, and use this upon the place.

781. Rumput tahi babi. Telok Anson, 16261.—Vertigo. Poultice the head with it.

782. Rumput tahi babi. Telok Anson, 15886.—Catarrh. The same.

783. Rumput tahi babi. Telok Anson, 15856.—Headache in women. The same.

785. Rumput tahi babi. Telok Anson, 16169.—All sorts of diseases. The same.

786. Daun lok (lolok) kemala hakim. Telok Anson, 16258.—The same.

787. Rumput tahi babi. Tanjong Malim, 14054.—Quartan
fever. Pound the leaves, squeeze out the juice, and drop it into the left eye.

788. Rumput tahi babi. Tanjong Malim, 14005.—Diarrhoea and other complaints. Pound the leaves with *Momordica charantia*, &c., and poultice the abdomen. See no. 618.

789. Rumput tahi babi. Raub, 16815.—Headache. Pound the leaves, and poultice the head.

790. Rumput tahi babi. Raub, 17004.—Ear-ache. Pound the leaves, and squeeze the juice into the ear.

791. Rumput tahi babi. Beserah, 17556.—Sore eyes. Pound the leaves with leaves of *Mimusops Elengi* and the bark of *Baccaurea Molleyana*, squeeze out the juice, and drop it into the eye.

792. Rumput tahi babi. Bentong, 16749.—Headache from exposure to the sun. Pound the leaves, and poultice the head.

**Bidens pilosa**, Linn.

794. Kancing baju. Raub, 16835.—Sore eyes. Pound the plant with alum, squeeze out the juice, and drop this into the eye.

**Synedrella nodiflora**, Gaertn. f.

795. Getang. Telok Anson, 16159.—Ear-ache. Pound the leaves and seed of *Nigella sativa*, and place in the ear.

**Spilanthes Acmella**, Murr.

796. Is stocked in Chinese herbalists’ shops in Singapore and Penang.

**Wedelia biflora**, DC.

797. Serunai laut. Telok Anson, 10310, 15905.—Swellings and varicose veins. Pound the leaves with lime, and poultice.

798. Serunai laut. Telok Anson, 10316.—Cuts and insect bites. The same.

799. Serunai laut. Telok Anson, 15274.—Discoloration of the skin (kedal). The same.

**Eclipta alba**, Hassk.

801. Dawah. Telok Anson, 15931.—Cuts. Pound the plant, and poultice with it.

802. Aging-aging. Telok Anson, 16158.—Vertigo. Boil the leaves with seed of *Nigella sativa*, and drink the decoction.

803. Orang-aring. Telok Anson, 10305.—Child-birth. Boil the plant with seed of *Cuminum cyminum* in a covered pot, and drink the decoction as an ubat meroyan.

It is stocked in Chinese herbalists’ shops in Penang.
Vernonia javanica, DC.
804. Kayu kepialu. Raub, 17014.—Fever. Scrape the root, mix the scrapings with water, and drink.
805. Berambong. Bentong, 16592.—High fever. Boil the bark with the barks of Artocarpus sp. and Ficus hispida and plants of Costus species and Monochoria vaginalis, and drink the decoction.

Vernonia cinerea, Less.
806. Chongchong hari. Telok Anson, 16160.—Headache. Pound the leaves with the seed of Nigella sativa and an onion, and poultice the head.
807. Chenderong hari. Telok Anson, 14345.—Wounds. Pound the leaves with lime, and apply.
808. Jenduang hari. Telok Anson, 15610.—Ringworm. Pound the leaves, and rub them over the place.

It is stocked in Chinese herbalists’ shops in Penang (13669).

Notonia grandiflora, DC.
809. It is stocked in Chinese herbalists’ shops in Ipoh (13358).

Emilia sonchifolia, DC.
810. It is stocked in Chinese herbalists’ shops in Penang.

Blumea balsamifera, DC.
811. Chapa. Alor Sta, 10460.—Beri-beri. Boil the leaves, and use the decoction as a lotion.
812. Chapa. Grik, 12507.—Rheumatism. The same preparation, to be used hot.
814. Chapa. Kuala Kangsar, 15541.—Child-birth. Boil the leaves, and give the decoction to drink as an ubat meroyan.
816. Chapa. Telok Anson, 16293, 15908.—Fever. The same.
817. Chapa. Telok Anson, 15297.—Stomach ache. Boil the leaves with the seed of Pimpinella anisum, and drink the decoction.
818. Chapa. Telok Anson, 16259.—Inflammation about the heart. Eat the leaves with betel.
820. Chapa. Tanjong Malim, 14059.—Headache. Pound the leaves along with leaves of Sida rhombifolia, and poultice.
821. Chapa. Tanjong Malim, 14081.—Enlarged spleen. Heat the leaves with leaves of Mitragyne speciosa, &c., and apply hot over the spleen. See no. 646.
822. Sembang (usually sembong). Kuala Lipis, 15760.—Cuts. Crush the leaves and apply.
823. Chapa. Raub, 16222.—Child-birth. Boil the roots, and drink the decoction as an ubat meroyan.
824. Chapa. Beserah, 17648/1.—Child-birth. Pound the leaves, and smear over the body.
825. Sembong. Pekan, 17299.—Loss of appetite. Eat the leaves, and drink a decoction of the roots.
826. Sembong. Pekan, 17266.—Fever. Boil leaves and roots, and drink the decoction.
827. Chapa. Bentong, 16617.—Skin complaints. Pound the leaves, infuse, and use as a lotion.

**Erigeron linifolius**, Willd.

**STYLIDIACEAE**

?**Stylidium sp.**
831. Seen in stock in a Chinese herbalist’s shop in Singapore.

**CAMPANULACEAE**

**Pentaphragma begonifolium**, Wall.
832. Salang suwang. Taiping, 10551.—Swellings. Poultice with the roots.

ASCLEPIADACEAE

Asclepias curassavica, Linn.

Calotropis gigantea, R. Br.
923. Remiga. Telok Anson, 15863.—Toothache. The latex is put into the tooth.
924. Lembegah. Beserah, 15863.—Tonic. Boil the leaves and the flowers, and drink the decoction.

Hoya ?diversifolia, Blume
925. Kekapal. Kuala Kangsar, 15982.—Fever and rheumatism. Boil the leaves, and use the decoction in the bath.

Hoya coriacea, Blume
926. Chuk (the latex,—a Sakai word). Tapah, 14276.—Cough and asthma. Boil the leaves and drink the decoction.

LOGANIACEAE

Fagraea racemosa, Jack
927. Sepuleh. Alor Sta, 10476.—Ulceration of the nose. Pound the root, and poultice.
928. Sepulit or sepuleh or puleh. Grik, 13633, 13741.—Tonic after fever. Boil the root and drink the decoction.
929. Dada kura. Telok Anson, 15269.—Malaria. Heat the leaves, and apply hot to the abdomen.
931. Sekobang. Raub, 17007.—Fever in children. Boil the leaves, and use the decoction in a bath.
932. Sepuleh. Beserah, 17586.—Fever. Boil the roots and drink the decoction.
933. Sepuleh. Beserah, 17643.—Fever. Boil the roots with the leaves of Eurycoma longifolia, &c., and drink the decoction. See no. 263.
934. Sepuleh. Bentong, 16485.—Sickness in the bones. Take twigs with twigs of Delima sarmentosa, &c., and exorcise the disease by beating the body with the bunch. See no. 5.
935. Sebereteh kayu. Bentong, 16613.—Tonic. Boil the
leaves with the leaves of *Sandoricum indicum*, &c., and drink the decoction. See no. 271.

**Cryptophyllum peregrinum**, Blume

936. Tembusu. Alor Sta, 10468.—Blood in stools. Boil its root and drink the decoction.

**BORAGINACEAE**

**Heliotropium indicum**, Linn.

937. Rumput ekor kuching. Telok Anson, 15862.—Want of control of urine in children. Pound this plant, and poultice upon the abdomen.

**CONVOLVULACEAE**

**Erycibe ?aenea**, Prain

938. Langsat hutan. Raub, 16248.—Child-birth. Boil the roots, and use the decoction as an ubat meroyan.

**Merremia vitifolia**, Hallier f.

940. Ulan raya. Raub, 16819.—High fever. Infuse its leaves along with leaves of *Pericampylus incanus*, &c., in water for a night, and give to drink morning by morning, or evening by evening. See no. 72.

**Merremia convolvulacea**, Hallier f.

941. Ulan pelandok. Kuala Tembeling, 15845.—Cracks in hands and feet. Pound the leaves with turmeric and broken rice, and poultice.

**Merremia umbellata**, Hallier f.

942. Ulan tapak pelandok. Budu, 15808.—Burns and scalds. Pound the leaves, and poultice.

**Ipomoea sagittifolia**, Burm.

943. Selepat tunggal (probably for selepat tungau). Telok Anson, 16196.—Headache. Pound the leaves with the seed of *Nigella sativa*, and poultice the head.

**SOLANACEAE**

**Solanum nigrum**, Linn.

944. Kelampong puyoh. Telok Anson, 16163.—Yaws. Boil the plant, and use the decoction as a lotion.

**Solanum verbascifolium**, Linn.

947. Daun sangsara. Batu Gajah, 13412.—Child-birth. Boil the leaves, and use the decoction for washing the body.

**Solanum ferox**, Linn.

948. Terong asam. Tapah, 13957.—Fever which recurs at night. Boil the roots, and use the decoction as a fomentation.

949. Terong asam. Tanjong Malim, 14012.—Syphilis. Boil the roots with *Pandanus* leaves and galls of *Quercus infectoria*, and drink.

**Solanum torvum**, Sw.

**Solanum sarmentosum**, Nees.

952. Terong puyoh. Grik, 12309.—Fever. Pound the leaves with those of *Bricea sumatrana*, and drink the juice.

**Solanum trilobatum**, Linn.

953. May be found stocked in Chinese herbalists’ shops in Penang (13657).

**Capsicum annum**, Linn.

954. Chili besar. Bentong, 16589.—Gonorrhoea. Boil the roots with the roots of *Areca Catechu*, *Pandanus sp.*, and *Scleria sumatrensis*, and drink the decoction. See 1565.

**Physalis minima**, Linn.

955. Letup. Telok Anson, 15920.—Fever. Poultice with the plant.

It is stocked in Chinese herbalists’ shops in Penang (13656).

**Datura fastuosa**, Linn.

958. Terong pengar. Alor Sta, 10438.—Boils. Poultice with the leaf.

959. Kechubong. Grik, 12308, 12527.—Asthma. Burn the seed and inhale the smoke.

**SCROPHULARIACEAE**

**Herpestis Monniera**, H. B. and K.

962. Is stocked in Chinese herbalists’ shops in Penang (13666, 13697).
Limnophila villosa, Blume
963. Is stocked in Chinese herbalists’ shops in Penang (13664).

Limnophila erecta, Benth.
964. Is stocked in Chinese herbalists’ shops in Penang (13667).

Vandellia crustacea, Benth.
It is stocked in Chinese herbalists’ shops in Penang (13662).

Torenia polygonoides, Benth.
966. Rumput kerak nasi. Telok Anson, 15623.—Dropsy. Pound the plant with rice flour, and poultice the abdomen.
It is stocked in Chinese herbalists’ shops in Penang (13663).

Curanga amara, Juss.
967. Lempedu tanah. Kuala Kangsar, 16049.—Stomach ache. Boil the plant and drink the decoction.
969. Lempedu tanah. Kuala Kangsar, 16049.—Loss of appetite. The same.

Bonnaya brachiata, Link and Otto
971. Rumput jari chichak. Grik, 12329.—Child-birth. Pound the plant, and drink the juice as an ubat meroyan.

Scoparia dulcis, Linn.
972. Pokok kelambu. Alor Sta, 10464.—Syphilis with pus (karang nanah). Boil the plant and drink the decoction.
It is stocked in Chinese herbalists’ shops in Penang (13689).

GESNERACEAE

Aeschynanthus ?marmorata, T. Moore

Aeschynanthus sp.
974. Sawai (Sakai name). Kuala Lipis, 15750.—Worms in children. Infuse the plant in cold water, and give the infusion to drink.

Didissandra frutescens, Clarke
975. Tarum hutan. Taiping, 13256.—Child-birth. Boil the roots, and use the decoction as an ubat meroyan.

Didymocarpus crinita, Jack

**Cyrtandromoea grandis**, Ridl.
979. Bayam beraleh. Raub, 16995.—Fever. Pound the leaves, and poultice with them.

**Cyrtandra pendula**, Blume
980. Meroyan panas. Bentong, 16715.—Fever after childbirth. Boil the plant and drink the decoction.

**Cyrtandra pilosa**, Ridl.

**Cyrtandra cupulata**, Ridl.
983. Kabut (Sakai name). Bentong, 16714.—Fever. Boil the leaves and the roots, and drink the decoction.

?**Cyrtandra sp.**

**Beilschmiedia ? pahangensis**, Gamble

? **Beilschmiedia pahangensis**, Gamble
1211. Rambutan pachat. Pekan, 17225.—Stomach-trouble after child-birth. Boil the bark and drink the decoction.

**Cinnamomum iners**, Blume (?? forma C. paraneuron, *Miq.*)
1212. Teja. Kuala Kangsar, 16037.—Child-birth. The leaves and the roots are boiled, and the decoction used as an ubat meroyan.
1213. Sela prawas (Sakai name) and chong keradak. Tapah, 14300.—Use not recorded.
1215. Teja. Raub, 16962.—Rheumatism. Take the leaves and poultice with them.

**Cinnamomum iners**, Blume
1216. Teja. Grik, 13635.—Malaria. A decoction used.

**Cinnamomum ? iners**, Blume
1217. Kayu tajam lawang and teja lawang. Grik, 12374, 13726.—Child-birth. Boil the leaves, and use the decoction as an ubat meroyan.
Cinnamomum javanicum, Blume
1218. Ubat kura bengak. Grik, 13632.—Enlarged spleen. Pound the roots in oil, and apply over the spleen: they blister.
1219. Lawang kecil. Kuala Kangsar, 16028.—Child-birth. Boil the leaves, and use the decoction as an ubat meroyan.

Cinnamomum sp.
1223. Medang teja. Bentong, 16722.—Pain, rheumatism, &c. Pound the leaves and poultice with them.

Litsea amara, Blume

Litsea ? spathacea, Gamble
1225. Derahan. Beserah, 17582.—Fever. Pound the leaves and poultice the head. Take the roots; boil, and drink the decoction.

Neolitsea zeylanica, Merrill
1226. Teja betina. Pekan, 17224.—Use not recorded, except that it is a substitute for teja jantan.

? Lindera selangorensis, Ridl.
1227. Kerabu. Bentong, 16531.—Noises in the head. Boil the leaves with the leaves of Lasianthus stipularis, and drink the decoction. See no. 755.

? Lindera sp.
1228. Teja. Beserah, 17598.—Child-birth. Boil the roots, and use the decoction as an ubat meroyan.

HERNANDIACEAE

Illegira ? appendiculata, Blume

THYMELAEACEAE

Wikstroemia Ridleyi, Gamble

LORANTHACEAE

Loranthus ferrugineus, Roxb.

1234. Mendalu. Tanjong Malim, 14056.—Fever. Boil the whole plant, and use the decoction for bathing.

**Loranthus pentandrus**, Linn.

**Loranthus grandifrons**, King

**Elytranthe globosa**, Don

1238. Mendalu. Grik, 12457.—Headache. Pound the leaves and poultice the head.

1239. Mendalu. Grik, 12457.—Child-birth. Take the juice and give to drink to promote the discharge of the after-birth.

**SANTALACEAE**

**Henslowia buxifolia**, Blume

1240. Setong jundor. Pekan, 17301.—Headache and giddiness. Pound the leaves and poultice.

**OPILIACEAE**

**Champereia Griffithii**, Hook. f.

**Lepionurus sylvestris**, Blume

**EUPHORBIACEAE**

**Euphorbia neriifolia**, Linn.

1244. Sudu-sudu. Grik, 13785.—Ear-ache. Squeeze the juice of heated leaves into the ear.

1246. Sudu-sudu and sesudu. Telok Anson, 10303, 15630 16274.—Ear-ache. The same. The latex is purgative.

Euphorbia heterophylla, Linn.
1249. Pekapa. Alor Sta, 10426.—Ague. Boil the bark and the root, and drink the decoction.

Euphorbia hirta, Linn.
1250. Ara tanah. Kuala Kangsar, 15598.—Sore eyes. Squeeze the milky juice into them.
1253. Lanchang. Bentong, 16547.—Bruises. Take the plant and poultice with it.

Euphorbia thymifolia, Burm.
1255. Rumput jangat. Grik, 12312.—Abdominal pain diagnosed as inflammation of the intestines. Boil the plant and drink the decoction.

It is stocked in Chinese herbalists’ shops in Penang (13675).

Euphorbia Tirucalli, Linn.
1256. Tentulang. Telok Anson, 16291.—Pains in the bones and joints. Boil the leaves, and foment.

Pedilanthus tithymaloides, Poit.
1258. Penawar lipan. Telok Anson, 16276.—Centipede bites. Apply the latex.

Bridelia stipularis, Blume
1262. Kerenan makan. Telok Anson, 16167.—Chancre. Pound the leaves with the seed of Nigella sativa finely, and poultice.

Bridelia monoica, Merr. (B. tomentosa, Blume)
1263. Kerenan. Grik, 13744.—Stomach ache. Boil the leaves with the roots of Rhodamnia cinerea and the leaves of Psidium Guyava, and drink.
1264. Kenedai. Raub, 16821.—High fever. Infuse the leaves with leaves of Pericampylus incanus, &c., in cold water, and give the infusion to drink. See no. 72.
Bridelia ? penangiana, Hook. f.
1265. Kenedai. Kuala Lipis, 15770.—Itch. Infuse the leaves in cold water, and use as a lotion.

Phyllanthus Niruri, Linn.
1266. Dukong anak. Grik, 13743.—Ulcers upon the feet. Pound the plants with the leaves of Ardisia oxyphylla, and poultice.
1267. Rami buah (for amin buah). Budu, 15805.—Caterpillar itch. Pound the plants, and poultice.
It is stocked in Chinese herbalists’ shops in Penang.

Phyllanthus urinaria, Linn.
1268. Amin buah (=ambin buah). Kuala Kangsar, 15557.—Diarrhoea. Boil the plant, and drink the decoction for mild diarrhoea.
1270. Dokong anak. Tapah, 13961.—Fever. Boil the plant and give the decoction to drink.
1271. Dokong anak. Tanjong Malim, 14055.—Loss of appetite in children. Pound the plant in coconut milk and give the milk to drink.
1272. Amin buah. Raub, 16215.—Diarrhoea. Boil the plant and drink the decoction.

Phyllanthus pulcher, Wall.
1274. Naga buwana. Alor Sta, 10429, 10462.—Gum-boils. Pound the leaves with cold rice and salt, and apply to the gums.
1275. Naga jimat. Grik, 12520.—Malaria. Pound the leaves with the leaves of ? Cnestis ramiflora, &c., and poultice.
1277. Naga jimat. Grik, 12520.—Stomach ache. Boil the leaves, and drink the decoction.
1280. Naga buwana. Kuala Kangsar, 15992.—Remittent fever. The same treatment, the poultice applied to the abdomen.
1285. Kayu puteh. Raub, 16980.—Sore eyes. Pound in cold water and wash the eye with the water.

**Phyllanthus ? reticulatus**, Poir.
1288. Kayu tampal besi. Raub, 16972.—Sore throat. Boil the leaves and drink the decoction.
1289. Kayu darah belut. Manchis, 16774.—Asthma. Pound the stem and leaves, and rub them upon the chest.

**Phyllanthus frondosus**, Wall.

**Glochidion littorale**, Blume
1291. Daun sau sik (apparently for daun sok-sik). Beserah, 17638.—Stomach ache. Boil the leaves with the root of Guioa pleuropteris, and drink the decoction.

**Glochidion obscurum**, Blume

**Glochidion sericeum**, Hook. f.
1294. Memputri. Grik, 12529.—Worms. Use the plant in the bath.

**Cicca disticha**, Linn.
1295. Cheremai. Pekan, 17211.—Coughs. Boil the root and inhale the steam. Also the juice may be drunk.

**Emblica pectinata**, Ridl.
1296. Tuwalang (for dulang). Bentong, 16542.—Fever. Boil the leaves and drink the decoction.

**Breynia discigera**, Muell.-Arg.
Breynia reclinata, Hook. f.
  1299. Lortan haji. Telok Anson, 14342.—Swellings. Pound the leaves, and poultice.
  1300. Kemanchong. Kuala Lipis, 15784.—Fever in children which returns at night. Pound the leaves, and poultice the abdomen.
  1302. Asin-asin. Kuala Tembeling, 15843.—Thrush. Pound the leaves and roots, and use the juice for rubbing over the lips and tongue, &c.

? Breynia reclinata, Hook. f.
  1304. Bungau. Raub, 17013.—Swellings. The same.

Breynia rhamnoides, Muell.-Arg.
  1305. Semomah. Beserah, 17646.—Child-birth. Pound the leaves, and drink the juice as an ubat meroyan.

Sauropus albicans, Blume
  1306. Chekor manis. Beserah, 17555.—Sore eyes. Pound the leaves with the root of Punica Granatum and the leaves of Jasminum Sambac, and squeeze the juice into the eye. See no. 603.
  1307. Chekor manis. Pekan, 17219.—Ulceration of the nose. Pound the leaves with roots of Ervatamia coronaria, & c., and sniff up the mixture into the nostrils. See no. 908.

Sauropus parvifolius, Ridl.
  1308. Merakah yang. Raub, 16850.—Colic. Boil the leaves with the root of Abrus ? pulchellus, & c., and drink the decoction.

Antidesma Ghaesembilla, Gaertn.
  1312. Guchek. Beserah, 17635.—Or it may be pounded with the leaves of Mussaenda glabra only, and applied.

Antidesma montanum, Blume

Baccaurea Motleyana, Muell.-Arg.
  1314. Rambai. Telok Anson, 15648.—Sore eyes. Pound the bark, and drop the liquid into the eye.
  1315. Rambai. Beserah, 17557.—Sore eyes. Pound the
bark with the leaves of *Adenostemma viscosum* and *Mimusops Elengi*, and drop the juice into the eye. See no. 801.

*Aleurites moluccana*, Willd.

1316. Buah keras. Tanjong Malim, 14068.—Headache. Boil the leaves and apply to the forehead.

*Jatropha Curcas*, Linn.

1317. Jarak. Grik, 13714.—Rheumatism. Pound the leaves and rub with the juice.

1319. Jarak melaka. Batu Gajah, 13371.—Circumcision. Apply the juice to the wound.

1320. Jarak pagar. Telok Anson, 15692.—Wounds. Apply the latex.

*Croton caudatum*, Geisel

1321. Gurah peria. Alor Sta, 10459.—Constipation. Boil the plant and drink the decoction.

*Croton tiglium*, Linn.

1324. Jemakian or chemkian. Kuala Kangsar, 15979.—The seeds as a purgative.

*Croton argyratum*, Blume

*Codiaeum variegatum*, Blume

*Acalypha siamensis*, Oliv.

1328. Te. Beserah, 17606.—Fever. Pound the leaves, and poultice.

*Coelodiscus montanus*, Muell.-Arg.

1329. Berkuching. Grik, 13631.—Eczema. Pound the leaves, and poultice.

*Mallotus macrostachyus*, Muell.-Arg.

1330. Mesepat. Kuala Kangsar, 15553.—Wounds. Boil the leaves, and clean wounds with the decoction.

1331. Balek angin. Kuala Tembeling, 16063.—Circumcision. Rub the hairs from the young leaves, and dust these upon the wound.
Mallotus \textit{? macrostachyus}, Muell.-Arg.
1332. Balek angin. Raub, 16824.—Fever after child-birth (within a year). Pound the tender leaves, and drink the juice with water.

Mallotus \textit{barbatus}, Muell.-Arg.
1334. Balek angin. Alor Sta, 10467.—Flatulence. Pound the leaves with black pepper, ginger, and broken rice, and poultice the abdomen.

Mallotus \textit{cochinchinensis}, Lour.
1335. Mesepat hitam. Tapah, 13530.—Wounds. Boil the leaves, and clean wounds with the decoction.

Mallotus \textit{floribundus}, Muell.-Arg.
1339. Mempasuh. Grik, 13788.—Stomach ache. Boil the leaves and drink the decoction.
1340. Tampin. Kuala Lipis, 15759.—Puru in children. Boil the leaves and wash the skin with the water.
1341. Maya-maya. Raub, 16206.—High fever. Boil the root and drink the decoction.

Mallotus \textit{philippinensis}, Muell.-Arg.
1343. Rambai kuching. Kuala Kangsar, 15593.—To prevent children from urinating when asleep. Use the leaves.

Mallotus \textit{anisophyllus}, Hook. f.
1344. Kayu kering. Raub, 16954.—Ear-ache. Pound the leaves and drop the liquid into the ear.

Mallotus \textit{sp}.
1345. Mesepat puteh. Tapah, 13524.—Wounds. Boil the leaves, and clean the wounds with the decoction; also a little of it may be drunk.

Macaranga \textit{megalophylla}, Muell.-Arg.
1346. Selaru. Tapah, 14296.—Diarrhoea. Boil the bark of the root and drink the decoction.
1347. Menkubong. Raub, 17000.—Dysentery. Boil the root and drink the decoction.
Macaranga triloba, Muell.-Arg.
1348. Mahang. Raub, 16826.—Boils on the head. Pound the leaves, and poultice, alone or with Wendlandia paniculata and Smilax Helferi.

Macaranga Griffithiana, Muell.-Arg.
1350. Mahang. Bentong, 16616.—Possession. Pound the leaves in water, and wash the face of those who have suffered possession (are delirious, for instance).

Macaranga incisa, Gage

Macaranga ? Hullettii, King
1352. Balek angin. Grik, 12362.—Stomach ache. Boil the leaves and drink the decoction.

Macaranga Tanaria, Muell.-Arg.
1353.—Tampu puteh and tampu hitam. Kuala Kangsar, 15568, 15569.—Wounds. Pound the leaves, and poultice.

Macaranga dentulcuta, Muell.-Arg.
1354. Mesepat. Telok Anson, 15299.—Wounds. Boil the leaves, and use the decoction for washing wounds.

Ricinus communis, Linn.
1356. Jarak berumah. Grik, 12361.—Deafness. Blow into the ear and then insert a bit of the stalk.
1357. Jarak. Bentong, 16618.—Skin diseases. Extract the oil and rub it over the skin.
1358. Jarak. Bentong, 16618.—Rheumatism. Oil the leaves, heat, and apply them. If the leaves stick to the skin, it is considered that they will cure.

A peculiar race is stocked in Chinese herbalists’ shops in Penang (13607).

Homonoia riparia, Lour.
1359. Keléreh. Grik, 12342, 13796.—Skin diseases. Pound the leaves, and poultice. Also, if desired, a decoction may be made and a little of it drunk.

Gelonium glomerulatum, Hassk.
1360. Penawar puteh. Beserah, 17594.—Fever. Boil the leaves and drink the decoction.

Baliospermum axillare, Blume
1361. Maharaja lela. Kuala Kangsar, 16048.—Constipation. Boil the leaves and drink the decoction.
Homalanthus populifolius, Grah.
1362. Mumah lapan. Kuala Kangsar, 10348.—Fever. Oil the leaves, and heat them: apply them over the stomach.

URTICACEAE

Trema amboinensis, Blume

Gironniera hirta, Ridl.

Phyllochlamys spinosa, Bureau
1365. Pokok temiyang. Grik, 13777.—Ulcers. Boil the bark, and poultice. Cold in the head. Burn the bark and inhale the smoke.

Ficus parietalis, Blume

Ficus callicarpa, Miq.
1367. Teriak. Tapah, 13982.—Fever in children. Pound the leaves and poultice the head.
1368. Ipi kelah. Tapah, 13981.—Toothache. The same treatment, poulticing the cheek.

Ficus hispida, Linn.
1370. Seniyah. Sungei Raya, 13394.—Fever. The same preparation.
1371. Senil. Telok Anson, 16252.—Boils. Take the leaves and poultice with them.
1372. Ara sungei. Pekan, 17218.—Ulceration of the nose. Pound the young leaves with roots of Ervatamia coronaria, &c., and sniff into the nostrils. See no. 908.
1373. Ara bombong. Bentong, 16470.—Stomach ache in children. Boil the bark and give the decoction to drink.
1374. Ara bombong. Bentong, 16593.—High fever. Boil the bark with the bark of Vernonia javanica, &c., and drink the decoction. See no. 805.

Ficus ? polysycce, Ridl.

Ficus alba, Reinwardt
1376. Semelit dadeh. Grik, 13624.—Kidney complaints. Boil the leaves and drink the decoction.
Ficus sp.
1377. Ara lempong. Grik, 13787.—To increase the flow of milk. Way of using not recorded.

Artocarpus Kunstleri, Hook. f.
1378. Terap. Grik, 12533.—Ulcers. Poultice with the inner bark.

Artocarpus integrifolia, Linn.
1379. Nangka. Grik, 12518.—Ulcers. Burn the leaves with seeds of maize and coconut shells, and apply the ashes.
1380. Nangka. Bentong, 16591.—High fever. Boil the bark with the bark of Vernonia javanica, &c., and drink the decoction. See no. 805.
1382. Nangka bubor. Pekan, 17272.—Fever. Boil the root and drink the decoction. If desired, it may be taken with root of Hibiscus rosa-sinensis, &c., and the decoction of all together drunk. See no. 165.

Conocephalus amoenus, Hook. f.
1383. Chentawan. Manchis, 16781.—Fever. Pound the leaves and drink the juice; also poultice with the leaves.

Conocephalus ? amoenus, Hook. f.
1384. Semelit papan. Grik, 13625.—Kidney complaints. Boil the leaves and drink the decoction.
1385. Sentawan. Raub, 16848.—Fever. Oil the leaf, heat and apply it to the abdomen.

Conocephalus suaveolens, Blume

Conocephalus sp.
1387. Murah (?=muru). Grik, 13751.—Child-birth. Take the leaves and poultice the head.

Hullettia dumosa, King
1388. Ampedai tiong. Kuala Kangsar, 16040.—Abdomen, all diseases of. Boil the leaves and drink the decoction.
1389. Menhim (Sakai name). Tapah, 14283.—Toothache. Apply the gum from the bark to the tooth.

Laportea stimulans, Miq.

Pellionia Duvauana, N. E. Brown
1392. Sisek keli. Grik, 12521.—Fever and abdominal pain. Pound the plant with the leaves of *Cnestis ramiflora* and of *Phyllanthus pulcher*, and poultice.

1396. Sisek tenggiling. Raub, 16839.—Abdominal pains. The same.

1397. Sisek tenggiling. Bentong, 16533.—Any severe abdominal complaint diagnosed as inflammation of the intestine. The same.

*Elatostema sessile*, Forst.

1398. Sisek tenggiling. Bentong, 16534.—Use as a substitute for the last.

*Boehmeria nivea*, Hook. and Arn.

1399. Rami. Kuala Kangsar, 15580.—Boils. Pound the leaves, and poultice to hasten the ripening.

*Pouzolzia indica*, Gaudich.

1400. Ubai etek or aubi etek. Telok Anson, 15608, 16288.—Worms. The plant is pounded and applied to the abdomen, and is eaten also.

1402. Rubai. Raub, 16834.—Worms. Boil the leaves and drink the decoction, or eat them.

It is stocked in Chinese herbalists' shops in Penang.

**CASUARINACEAE**

*Casuarina equisetifolia*, Forst.

1403. Ru. Beserah, 17632.—Swellings. Boil the twigs with leaves of *Citrus decumana*, and use the water for bathing.

**SALICACEAE**

*Salix tetrasperma*, Roxb.

1404. Dedalu. Kuala Kangsar, 15965.—Ulceration of the nose. Boil the leaves, and use the decoction cold as a lotion.

**ORCHIDACEAE**

*? Hippeophyllum Scortechinii*, Schlechter.

1406. Pokok setawar bakar perah. Kuala Lipis, 15766.—Ear-ache. Heat the leaves and drop the juice into the ear.
Dendrobium subulatum, Hook. f.

1407. Anggerek (=orchid). Telok Anson, 15279.—Headache. Pound the leaves, and poultice. The Malay name suggests (because it is applied to epiphytic orchids in general) that any one using this treatment would not be particular to use this species of Dendrobium.

Dendrobium ? planibulbe, Lindl.

Dendrobium crumenatum, Swartz

1409. Sepuleh tulang. Kuala Kangsar, 16016.—Bewitchment. Use the plant for sprinkling water through the house after a death has occurred in it to keep the spirit from haunting it.

Dendrobium sp.

Spathoglottis plicata, Blume

1411. Wah (Sakai name). Tapah, 14282.—Rheumatism. Boil the plant, and foment with the decoction hot; also drink a little of it.

? Plocoglottis porphyrophylla, Ridl.

Cymbidium Finlaysonianum, Lindl.

1413. Sepuleh. Telok Anson, 16296.—Bewitchment. The same.

Vanda Hookeriana, Reichb. f.

1414. Tulang. Telok Anson, 16278.—Pains in the joints. Boil the plant and foment with the decoction.

Aplostelis flabelliformis, Ridl.

Tropidia curculigoides, Lindl.

1416. Serugat. Telok Anson, 16255.—Diarrhoea. Boil the roots and drink the decoction.

1417. Ranchang hantu. Bentong, 16545.—Malaria. Boil the plant with leaves of an Ardisia, and drink the decoction in the cold stage of the fever. See no. 870.

? Cystorchis sp.

1418. An undetermined orchid has been found stocked in a Chinese herbalist’s shop in Penang (13605) under the name of cheok seng.
Globba panicoides, Miq.
1419. Haliya hantu or haliya rimbah. Kuala Kangsar, 13280, 13296.—Child-birth. Pound the rhizome, and poultice the abdomen during or after child-birth.

Globba aurantiaca, Miq.
1420. Meroyan berok. Bentong, 16746.—Child-birth. Boil the plant, and drink the decoction as an ubat meroyan.

Hedychium ? longecornutum, Baker
1421. Tepus hinggap, Manchis, 16771.—Worms in children. Boil the plant, and use the decoction in a bath.

? Hedychium coronarium, Koen.
1422. Ganda suli. Kuala Kangsar, 15977.—Indigestion. Boil the leaves and drink the decoction.

Kaempferia Galanga, Linn.
1425. Chekor or chekor jawa. Kuala Kangsar, 15573, 15586.—Fever. Pound leaves and roots with broken rice, and apply, one says to the head, another to any part of the body but the head.
1429. Chekor. Tapah, 13955.—All diseases. Boil the rhizome and use as a hot fomentation.
1430. Chekor. Tanjong Malim, 14031.—Rheumatism. Boil the rhizome with that of Curcuma domestica and of Acorus Calamus, and use the decoction as a hot fomentation.

Gastrochilus pandurata, Ridl.
1432. Temu kunchi. Telok Anson, 15272.—Stomach ache. Pound the rhizome and eat it.

Gastrochilus sp.
1433. Tepus sa-helai sa-tahun. Grik, 13629.—Child-birth. Boil the rhizome or leaves, and use the decoction as an ubat meroyan.
Curcuma domestica, Valeton
1435. Kunyit. Grik, 12337.—To promote a flow of milk. Pound the rhizome with leaves of *Jasminum sambac*, and poultice the breasts.
1437. Kunyit. Telok Anson, 15605.—Child-birth. Pound the leaves and the roots, and bandage upon the abdomen after child-birth. A Zingiber may be mixed with it.
1438. Kunyit betul. Telok Anson, 16197.—Cracked feet. Pound the rhizome with tubers of *Dioscorea hispida* and benzoin, and poultice the feet.
1439. Kunyit. Bentong, 16478.—Colic in children. Boil the rhizome with an onion and a tuber of garlic, and give the decoction to drink.

Curcuma xanthorrhiza, Roxb.
1440. Temu lawak. Telok Anson, 16197.—Indigestion. Boil the rhizome with rhizomes of *Zingiber officinale* and *Z. Cassumunar* and a few pepper-corns, and drink.
1441. Temu lawak. Telok Anson, 16197.—Rheumatism. The same.

Curcuma ? xanthorrhiza, Roxb.
1442. Temu raya. Batu Gajah, 13412.—Child-birth. Boil the plant and use the decoction as a wash.

Curcuma sp.
1443. Temu. Tapah, 13963.—Child-birth. Boil the rhizome, and use the decoction as an ubat meroyan.

Costus speciosus, Smith
1445. Setawar hutan. Kuala Kangsar, 15529.—Fever. Pound the leaves in cold water, and use the water for cooling the head.
1446. Setawar hutan. Batu Gajah, 13373.—Fever. Boil the leaves, and wash the body with the decoction while hot.
1447. Setawar hutan. Telok Anson, 15859, 15907.—Cough. Eat the rhizome with betel.
1448. Tabar (Sakai name). Tapah, 14298.—Fever. Boil the leaves, and wash the body with the hot decoction after the fever has broken.
1449. Setawar hutan. Tapah, 13975.—Leprosy. Scrape the stem, and poultice with the scrapings.
1450. Setawar hutan. Tanjong Malim, 14028.—Small-pox. Boil the plant with leaves of *Psophocarpus tetragonolobus*, of *Stachyphrynium sp*. and of *Drymoglossum heterophyllum*, and make a wash for application to the skin.
1451. Setawar. Bentong, 16590.—High fever. Boil this with
bark of Vernonia javanica, &c., and drink the decoction when cold, and spray it over the whole body. See no. 805.

Zingiber officinale, Rosc.
1452. Haliya. Grik, 12379.—Tonic. The rhizome is eaten.
1456. Kunyit terus. Tapah, 13956.—Fever. The same.
1457. Kunyit terus. Tanjong Malim, 14032.—Rheumatism, &c. Boil the rhizome with rhizomes of Kaempferia Galanga and of Acorus Calamus, and foment with the decoction.
1458. Haliya. Kuala Tembeling, 15847.—Ague in children. Pound the leaves with the leaves of Acorus Calamus in water, and sprinkle the water upon the child’s face.

Zingiber officinale, Rosc. var.
1460. Haliya bara. Batu Gajah, 13385.—Fever. Boil the rhizome, and use the decoction in the bath.
1461. Haliya bara. Telok Anson, 16198.—Indigestion. Boil the rhizome with those of Curcuma xanthorrhiza and Zingiber Cassumunar, and drink.

Zingiber officinale, Rosc. var.
1462. Haliya padi. Tanjong Malim, 14065.—Boil the rhizome with the rhizomes of Zingiber ? Cassumunar and of Acorus Calamus, and bathe in the decoction.

Zingiber officinale, Rosc. var.
1463. Haliya udang. Telok Anson, 15626.—Headache. Pound the leaves, and poultice.
1464. Haliya udang. Telok Anson, 15283.—Rheumatism. Eat the leaves with betel.

Zingiber officinale, Rosc. var.
1465. Kerjak (Sakai name). Tapah, 14272.—Headache. Pound the leaves, and poultice.

Zingiber spectable, Griff.
1466. Tepus haliya. Tanjong Malim, 14036.—Swellings, including beri-beri. Pound the leaves, and poultice.
1467. Chadak. Tanjong Malim, 14044.—Inflamed eyelids. Infuse any part of the plant in cold water, and drop the infusion into the eye.
Zingiber Cassumunar, Roxb.
1469. Kunyit terus merah. Kuala Kangsar, 15954.—Convulsions. Suspend the rhizome round the neck of a child.
1471. Kunyit bolai. Tanjong Malim, 14066.—Boil the rhizome with those of Zingiber officinale, var. 'Haliya padi' and of Acorus Calamus, and bathe in the decoction.
1473. Bolai. Pekan, 17281.—Stomach ache. Boil the leaves with black pepper-corns and bark of Mangifera sp. 'pauh' and of Beilschmiedia pahangensis, and drink the decoction.

Zingiber Ottensii, Valeton
1479. Kunyit terus hitam. Telok Anson, 15287.—Child-birth. The same; and the leaves may be used also.

Zingiber aromaticum, Valeton
1480. Lempoyang. Taiping, 13252.—Child-birth. The same, using the rhizome.

Zingiber ? chrysostachys, Ridl.

Amomum kepubala, Sprague and Burkill (A. Cardamomum, auctt., not of Linnaeus in 1753).
1482. It is used for flavouring medicines, and is eaten alone for cough or after child-birth. The fruits are to be had in Malay villages under the name pelaga, but not the plants.

Phaeomeria imperialis, Lindl.
1483. Kantan. Telok Anson, 15293.—Wounds. Boil the leaves, and clean the wounds with the decoction.
1484. Kantan. Tanjong Malim, 14002.—Ear-ache. Boil the fruit, and drop the decoction into the ear.

? Elettariopsis sp.
Languas conchigera, Burkill (Alpinia conchigera, Griff.)  
1486. Lengkuas kechil. Taiping, 13266.—Rheumatism. Take all parts of the plant and apply.  

Languas ? conchigera, Burkill  
1488. Lengkanan. Alor Sta, 10433.—Dysentery. Method of use not recorded.

Languas Galanga, Burkill (Alpinia Galanga, Swartz)  

Languas scabra, Burkill (Alpinia scabra, Benth.)  
1490. Lengkuas. Tapah, 13954.—Child-birth. Boil the leaves, and use the water for a lotion.

Languas ? scabra, Burkill  
1491. Lengkuas raya. Batu Gajah, 13416.—Vertigo. Heat the leaves by means of hot stones, and apply them to the abdomen.

Languas ? melanocarpa, Burkill (Alpinia melanocarpa, Ridl.)  

Languas sp.  
1494. Tepus belalah. Grik, 13623.—Sore tongue. Boil the leaves, and use the decoction as a gargle.  

MARANTACEAE

Stachyphrynium Jagoranum, K. Schum.  

Stachyphrynium ? parvum, Ridl.  
1497. Lerek tikus. Grik, 13626.—Excess of urine in children. Boil the leaves; give the decoction to drink, and poultice externally with the lees.

Stachyphrynium sp.  
1498. Keladi bemban. Tanjong Malim, 14029.—Small-pox. Boil the tubers with leaves of Psophocarpus tetragonolobus, &c., and use the decoction as a lotion. See Psophocarpus, no. 425.
Musa paradisiaca, Linn.
1499. Pisang. Telok Anson.—Circumcision and like wounds. Infuse unripe bananas and the leaves of Garcinia Mangostana; thicken with benzoin, and apply.

AMARYLLIDACEAE

Curculigo ? latifolia, Dryand.
1500. Lumbah. Bentong, 16472.—Sore eyes. Boil the leaves with the root of Hibiscus rosa-sinensis; and drop the decoction into the eye.

Curculigo sp.
1502. Lemboh. Raub, 17008.—Loss of appetite. Eat the fruit. It makes everything taste sweet by a curious action upon the taste-buds of the tongue.

Belamcanda chinensis, DC.

Crinum asiaticum, Linn.
1504. Rumput tembaga suasa. Telok Anson, 15897.—Use not recorded.
1505. Bawang tanah. Pekan, 17276.—Swollen joints. Oil the leaf, warm it, and bind it round the joint.

Crinum defixum, Ker

Crinum sp.
1508. Tembaga suasa. Batu Gajah, 13409.—Colic. The same treatment, applied to the abdomen.

Eurycles amboinensis, Lindl. (E. sylvestris, Salisb.)
1511. Sapenoh. Kuala Kangsar, 16017, 15567.—Possession. Take the leaves and sprinkle water with them about the house to ensure that a spirit shall not haunt it.
1512. Sapenoh. Telok Anson, 16152.—Possession. The same.

BROMELIACEAE

Ananas comosus, Merr. (A. sativus, Schultes)
Boil the leaves, mix the decoction with white sugar, and drink.

**TACCACEAE**

**Tacca cristata**, Jack

**Dioscoreaceae**

**Dioscorea hispida**, Dennst.
1515. Ubi arak. Telok Anson, 15298.—Yaws on the feet (puru lapak). Boil the leaves, and use the decoction as a lotion.
1516. Ubi arak. Tapah, 13976.—Sores on the feet. Rasp the tuber, and mix with a little lime or a little benzoin, and poultice.
1517. Ubi arak. Tanjong Malim, 14037.—Sores on the feet. Rasp the tuber, and mix it with a little turmeric; poultice.

**ROXBURGHIACEAE**

**Stichoneuron caudatum**, Ridl.

**Liliaceae**

**Peliosanthes sp.**

**Sansevieria trifasciata**, Prain
1520. Lidah buaya. Tapah, 13958.—Itch. Boil the leaves, and use the decoction as a fomentation.

**Dianella ensifolia**, Redouté

**Dracaena ? conferta**, Ridl.
1523. Pandan hutan. Karak, 16621.—Child-birth. Boil the leaves with the roots of *Hedyotis capitellata* and the leaves of *Didymocarpus crinita*, and use the decoration as an ubat meroyan.

**Dracaena graminifolia**, Wall.
1524. Rumput julong. Grik, 12526.—Poisoning. Boil the leaves and drink the decoction.

**Dracaena congesta**, Ridl.
1525. Jenjuang. Taiping, 13279.—Child-birth. Boil the leaves, and use the decoction as an ubat meroyan.
1526. Daun tapak leman (for tapak suleiman). Grik, 13718.—Rheumatism. Boil the leaves, and use the decoction for a fomentation.

1527. Rajah kayu. Grik, 12365.—Ulcers. The same treatment; but roots may be used as well as leaves.

**Dracaena ? congesta**, Ridl.

1528. Tapuh. Grik, 13720.—Worms. Method of use not recorded.

**Smilax calophylla**, Wall.

1529. Pokok tembaga suasa. Kuala Kangsar, 16039.—Swellings. Smear the leaves with coconut oil; heat them, and apply.

1530. Tongkat ali. Tanjong Malim, 14040.—Tonic (sexual). Eat the rhizome with betel.

**Smilax ? calophylla**, Wall.

1531. Batang sedawai. Manchis, 16775.—Tonic (sexual). Boil the rhizome and drink the decoction.

**Smilax myosotiflora**, DC.

1532. Akar ding. Raub, 16992.—Syphilis. Eat the leaves and the fruit.

**Smilax Helferi**, A.DC.

1534. Banar babi. Raub, 16828.—Boils on the head. Boil the plant with leaves of *Wendlandia paniculata* and *Macaranga triloba*, and poultice.

**Smilax sp.**

1535. Lada hitam hutan. Kuala Kangsar, 16036.—Childbirth. Boil the leaves, and use the decoction as an ubat meroyan.

**PONTEDERIACEAE**

**Monochoria vaginalis**, Presl

1536. Kelayar (elsewhere chachang layar). Bentong, 16594. Boils. Pound the leaves with turmeric, and poultice boils in the groin after they have commenced to discharge.

**COMMELINACEAE**

**Floscopa scandens**, Lour.

1537. Johong beraleh. Kuala Kangsar, 14920.—Child-birth. Boil the whole plant, and use it as an ubat meroyan along with other plants.

1538. Awo-owo (=aur-aur). Telok Anson, 15628.—Sore eyes. Squeeze the stem between the fingers, and drop the juice into the eye.

Forrestia gracilis, Ridl.
1541. Tebu kera. Raub, 16976.—Pains in the body. Boil the plant and drink the decoction.

PALMAE

Areca Catechu, Linn.
1542. Pinang. Grik, 12460.—Fever (bewitchment). Pound the leaves in water, and sprinkle the head of the patient.
1543. Pinang. Grik. Poisoning. Take the juice from the stump of a palm, rice, and the egg of a black fowl; cook together and swallow.
1544. Pinang. Telok Anson, 16177.—Dysentery. Boil the root and give the decoction to drink.
1546. Pinang. Tanjong Malim, 14016.—Dysentery. Boil the root with certain other plants and give the decoction to drink.
1547. Pinang. Tanjong Malim, 14051.—Stomach complaints. Dry the leaves and powder them with the leaves of Atalantia Roxburghiana and of Citrus aurantifolia, and swallow.
1549. Pinang. Bentong, 16486.—Pains in the bones. Take the leaves, with the leaves of Delima sarmentosa, &c., and exercise the disease by beating the body with them. See no. 5.

Cocos nucifera, Linn.
1550. Nyior. Grik, 12461.—Fever (bewitchment). Pound the leaves in water, and sprinkle the head of the patient.
1552. Nyior. Tapah, 13980.—Diarrhoea. Administer the milk from the nut.

Pinanga disticha, Blume
1554. Pinang penawar. Batu Gajah, 13404.—Stomach ache and as an antidote to poisons ingested. Take the seeds.

Oncosperma ? horrida, Scheff.
Didymosperma hastatum, Becc.
1556. Meriding. Beserah, 17620.—Fever. Boil the root and drink the decoction.
1557. Meriding. Beserah, 17560.—Loss of appetite. Roast the cabbage with a little salt, and eat it.
1558. Tukas (elsewhere tukus). Manchis, 16780.—Fever in children. Boil the root, and use the decoction in the bath.

Licuala triphylla, Griff.
1559. Palas. Raub, 16959.—Nausea. Pound the crown in cold water, and drink.

Daemonorrhops didymophyllus, Becc.
1560. Buah jerenang. Manchis, 16792.—The resin is medicinal for diarrhoea.

PANDANACEAE

Pandan ? Klossii, Ridl.

Pandan ? aurantiacus, Ridl.

Pandan sp.
1563. Pandan. Tapah, 13952.—Anaemia. Boil the leaves, and use the decoction as a hot lotion.
1564. Pandan bau. Tanjong Malim, 14013.—Syphilis. Boil the leaves with roots of Solanum ferox and galls of Quercus infectoria, and drink.

Pandans are stocked by Chinese herbalists in the Peninsula.

ARACEAE

Arisaema sp.
1566. Lekeh (for likir). Raub, 16973.—Malaria. Boil the plant, and use the decoction in a bath during the cold stage.

Colocasia esculentum, Schott (C. antiquorum, Schott)

Xanthosoma violaceum, Schott
1568. Birah hitam. Kuala Kangsar, 15987.—High fever. Spread the leaves over the bed, that the sick man may lie on them.
Homalomena sagittifolia, Jungh.

Homalomena coerulescens, Jungh.
  1572. Kemoyan. Budu, 15800.—Fever. Boil the rhizome and the leaves, and drink the decoction.

Homalomena, either the one or the other of the two last spp.
  1574. Kemoyang. Bentong, 16453.—Fever. Boil the rhizome and drink the decoction: poultice with the leaves.
  1575. Kemoyang. Karak, 16638.—Stomach trouble. Burn the rhizome and swallow the ashes.

Homalomena purpurascens, Schott
  1576. Geli (Sakai name). Raub, 16951.—Loss of voice. Boil the rhizome, and use the decoction cold.

Homalomena Griffithii, Hook. f.

Pothos scandens, Linn.
  1578. Seginting. Kuala Kangsar, 15560, 15994.—Convulsions and epilepsy. Pound the leaves in cold water, and use the water for bathing.

Cyperaceae

Kyllinga brevifolia, Rottb.
  1579. Sekepet burit. Telok Anson, 15917.—Diarrhoea. Eat the leaves with betel.
  1580. Katob perenggan (? katup perenggan). Telok Anson, 15621.—Diarrhoea. The same.

Fimbristylis aestivalis, Vahl
  1581. Rumput salah pemakai. Bentong, 16800.—Skin complaints. Pound the leaves with the leaves of Cassia alata, &c., and poultice. See no. 452.

Fimbristylis miliacea, Vahl

Fimbristylis ? asperrima, Boeckl.
Scleria lithosperma, Swartz

Scleria levis, Retz.

Scleria ? multifoliolata, Boeckl.
1586. Rumput sesayong. Grik, 13723.—Root medicinal. Use not recorded.

Scleria sumatrensis, Retz.

GRAMINEAE

Zea mays, Linn.
1588. Jagong. Grik, 12364.—Stomach ache. Boil the pith of the cob in water, and drink the decoction.

Imperata arundinacea, Cyrillo.
1589. Lalang. Grik, 12513.—Rheumatism. Burn the runners, and administer the ashes internally.
1590. Lalang. Bentong, 16614.—Diarrhoea. Boil the runners with leaves of Mezoneuron sumatranum, and drink the decoction.

Runners of this grass are stocked in Chinese herbalists' shops in Penang.

Saccharum arundinaceum, Retz.
1591. Tebu salah. Tapah, 13959.—Boils. An internal medicine.

Pogonatherum saccharoideum, Beauv.
1592. Rumput sembor batu. Batu Gajah, 13365.—Skin diseases. Pound the whole plant and poultice with it.
1593. Rumput sumbu buta (?badak). Kuala Kangsar, 10345.—Skin diseases. Burn the plant and rub the ashes upon the skin.

Chrysopogon aciculatus, Trin.
1594. Kemuchut (elsewhere kemunchup). Grik, 12512.—Rheumatism. Burn the plant with Imperata arundinacea, and swallow the ashes.

Cymbopogon citratus, Stapf
1595. Serai makan. Pekan, 17208.—Kidney trouble. Boil the shoots with the shoots of a Schizostachyum, and drink the decoction morning by morning.
Paspalum sp.
1596. Rumput benta minyak. Batu Gajah, 13388.—Colic. Boil the plant and drink the decoction.

? Paspalum sp.
1597. Rumput lidah rimau. Grik, 12511.—Bewitchment. Take the grass and plait it into a ring, through which pass the body, and the evil spirits cannot follow.
1598. Rumput lidah rimau. Grik, 13790.—Syphilis. Boil the plant with a little alum; give the decoction to drink.

Stenotaphrum Helferi, Munro
1599. Dadalipan. Grik, 12346, 12377, 12462.—Child-birth. Boil the plant, and administer the decoction as an ubat meroyan. Some say that it prevents any consequent digestive troubles; some that it prevents lockjaw.

Panicum sarmentosum, Roxb.
1601. Terupong (elsewhere kerubong). Grik, 12307.—Irregular menses. Pound the plant with Setaria plicata and Gigantochloa Scortechinii, and drink the juice.

? Panicum sp.
1602. Daun benta. Telok Anson, 15643.—Heartburn. Boil the leaves and drink the infusion.

Setaria plicata, T. Cooke
1603. Lachang. Grik, 12306, 13761.—Irregular menses. Boil the plant, either alone or with Panicum sarmentosum and Gigantochloa Scortechinii, and drink the decoction.

Phragmites communis, Trin.
1604. Tebu salah. Telok Anson, 15273.—Varicose veins. Pound the stem, and rub the juice over the skin above the veins.

Eleusine indica, Gaertn. f.
1605. Sambau. Kuala Kangsar, 16025.—Child-birth. Pound the leaves, and give the juice to drink to promote the discharge of the after-birth.

Lophatherum gracile, Brongn.
1607. Rumput bulu. Raub, 16983.—Chancre. The same.

Leptaspis urceolata, R. Br.
1610. Sinai anjing. Manchis, 16757.—Tonic to induce fertility. The same.
Bambusa ? Wrayi, Stapf
1611. Buloh gading. Alor Sta, 10454.—Gonorrhoea. Pound the young shoot, and poultice.
1612. Buloh gading. Grik, 12380.—Bewitchment. Plant the bamboo about the rice crops. They will not be destroyed by beetles.

Gigantochloa Scortechinii, Gamble
1613. Buloh hauw. Grik, 12305.—Irregular menses. Boil the leaves with leaves of Panicum sarmentosum and Setaria plicata, and drink the decoction.

Schizostachyum sp.
1614. Buloh. Pekan, 17207.—Kidney trouble. Boil the sprouts with Cymbopogon citratus, and drink the decoction. However, it is probable that a variety of bamboos may be used in this prescription.

GNETACEAE

Gnetum ? longispica, Ridl.

Gnetum tenuifolium, Ridl.
1616. Serapat akar. Batu Gajah, 13375.—Delayed menses. The seeds are eaten.
1617. Telinak. Raub, 16216.—Child-birth. Boil the root, and use the decoction as an ubat meroyan.

GLEICHENIACEAE

Gleichenia linearis, Clarke
1618. Resam. Batu Gajah, 13371.—Fever. Pound the leaves with the leaves of Croton caudatum, and poultice.
1619. Resam. Telok Anson, 15620.—Fever. Boil the leaves with rice-water, and use the decoction for a fomentation.
1620. Resam. Raub, 16820.—High fever. Infuse the tender leaves with those of Pericampylus incanus and Merremia vitifolia in water for a night, and give to drink on the next morning.
1621. Resam. Kuala Lipis, 15783.—Fever. Pound the leaves and poultice the forehead.
1622. Resam. Pekan, 17212.—Fever. Boil the leaves with the leaves of Gossypium brasiliense, &c., and drink sparingly of the decoction when cold. See no. 120.
1623. Resam. Bentong, 16455.—Fever. Boil the leaves with the leaves of Nephelium mutabile, and bathe the whole body with the decoction.
1624. Resam. Karak, 16626.—High fever. Boil the leaves with the leaves of Vitis trifolia, &c., and give to the patient to drink.
POLYPODIACEAE

Adiantum lunulatum, Burm.
1625. Paku sisek or paku mega. Kuala Kangsar, 10342.—Swellings in the neck. Pound the leaves, and poultice.

Adiantum caudatum, Linn.
1626. Paku siap-siap. Kuala Kangsar, 15575.—Pain in the chest. Boil the leaves and the roots, and drink the decoction.

Blechnum orientale, Linn.

Asplenium Nidus, Smith

Anisogonium esculentum, Presl

? Nephrodium heterocarpum, Blume
1632. Paku. Raub, 17016.—Discoloration of the skin. Rub the leaves upon the skin.

Pleopeltis viridis, Moore
1633. Keluwah. Grik, 12354.—Fever. Pound the leaves in water, and sprinkle the water over the head of the patient. The name suggests by means of the mouth.

Cyclophorus adnascens, Desv.
1634. Tetumpang. Telok Anson, 15887.—Dysentery. Method of use not recorded.

Cyclophorus acrostichoides, Presl
1635. Suloi (Sakai name). Kuala Lipis, 15784.—Child-birth. Pound the leaves in cold water, and drink the water. A treatment used by Sakai only.

Drynaria quercifolia, Linn.
1636. Kepala tupai. Grik, 12458.—Fever. Pound the leaves in water, and sprinkle the water over the head of the patient.

Drynaria quercifolia, Linn., or D. sparsisora, Moore

Drymoglossum piloselloides, Presl
1638. Akar petek. Grik, 12463.—Headache. Pound the leaves and apply to the head.
1639. Sebebeh (elsewhere paku sebeneh). Tanjong Malim, 14025.—Small-pox. Boil the leaves with those of *Psophocarpus tetragonolobus*, &c., and use the decoction as a lotion upon the skin.

**Ceropeteris calomelanos**, Kaulf.

**Taenitis blechnoides**, Swartz

1641. Meroyan paku or meroyan dawai. Bentong, 16667.—Child-birth. Boil the leaves, and use the decoction as an ubat meroyan.

**Platycerium bifurc*, Blume

1642. Semun bidadari. Grik, 13618.—Enlarged spleen.Burn the plant and rub the ashes over the body.

**Stenochlaena palustris**, Bedd.

1643. Akar lemidi. Grik, 12464.—Stomach ache. Boil the leaves and drink the decoction.

1645. Paku memiding. Telok Anson, 16164.—High fever. Boil the leaves and use the decoction as a lotion.

1646. Paku miding. Beserah, 17473.—Fever. Pound the leaves with the root of *Gossypium brasiliense*, &c., and drink the juice. See no. 120.

**Acrostichum aureum**, Linn.

1648. Pebisi. Telok Anson, 15288.—Boils. Pound the leaves, and poultice.

**Ceratopteris thalictroides**, Brongn.

1649. Paku roman. Grik, 12550.—Skin complaints. Pound the leaves, and poultice.

**ANGIOPTERIS EVECTA**, Hoffm.

1651. Paku gajah. Telok Anson, 16257.—Coughs. Pound the plant and drink the juice.

**LYGODIUM SCANDENS**, Swartz

1652. Daun ribu. Grik, 12353.—High fever. Boil the leaves and use the decoction as a lotion.

1654. Ribu-ribu nasi. Telok Anson, 15853.—Measles and eruptive skin complaints. Pound the leaves, and poultice.

1656. Ribu-ribu. Bentong, 16457.—Coughs. Infuse the leaves with the leaves of Averrhoa Bilimbi and Carallia suffruticosa in coconut milk, and drink cold.

It is stocked in Chinese herbalists’ shops in Penang (13700).

Lygodium flexuosum, Swartz

1657. Ribu-ribu kechil. Alor Sta, 10428.—Ringworm. As a poultice.

1658. Ribu-ribu. Beserah, 17574.—Fever. Pound the leaves with the root of Gossypium brasiliense, &c., and drink the juice. See no. 120.

OPHIOGLOSSACEAE

Helminthostachys zeylanica, Linn.

1659. Akar tunjok langit. Taiping, 13251.—Tonic. Pound the rhizome, and eat it with betel.

1660. Akar tunjok langit. Grik, 12326, 13708.—Tonic. The same.

1661. Akat tunjok langit. Telok Anson, 15650.—Tonic, used by women at their menses.

1663. Jelai (Sakai name). Tapah, 14295.—Syphilis. Method of using not recorded.

It is stocked in Chinese herbalists’ shops up and down the Peninsula.

SELAGINELLACEAE

Selaginella atroviridis, Spring

1664. Paku jambul merak. Taiping, 13293.—Stomach ache. Boil the plant and drink the decoction.

1665. Daun ekor merak. Grik, 12547.—Rheumatism. Pound the plant with Cleome viscosa, and poultice.

1667. Daun ekor merak. Grik, 12547.—Bubo in the groin. Pound the plant with Cardiospermum Halicacabum, and poultice.

1668. Daun ekor merak. Grik, 12547.—Asthma. Pound the plant and poultice the whole body.

Selaginella caudata, Spring

1669. Paku merak. Bentong, 16537.—Vertigo. Pound the plant and poultice the head.
Selaginella illustris, Ridl.

Selaginella Wallichii, Spring

Selaginella Willdenowii, Baker
1672. Paku merak. Raub, 16818.—High fever. Infuse the plant with leaves of Pericampylus incanus, &c., in cold water, and give the infusion to drink. See no. 72.

LYCOPODIACEAE

Lycopodium cernuum, Linn.
1673. Rumput kenarus. Raub, 16956.—Beri-beri. Boil the plant, and use the decoction cold for washing.

HYMENOMYCETES

Polystictus rhinocerotis, Cooke

Fungus rhizomorphs.
1675. Taleb (Sakai name) or akar batu. Tapah, 14294.—Possession. Twine the rhizomorphs into bracelets or necklaces, worn to ward off evil spirits.
